ZSB-BM005NBK [Japanese Packaging]

ZEROSHOCK carrying bag

A slim type "ZEROSHOCK" carrying bag with a front pocket, made with low-resilience polyurethane material and offering effective absorption to protect notebook PCs as well as mobile devices, such as smartphones, from impacts.

ZSB-BM005NBK

FEATURES

- A "ZEROSHOCK" carrying bag made with low-resilience polyurethane material that provides excellent shock absorption.
- Fits laptops with screen sizes up to 16.4 inches wide.
- Low-resilience polyurethane is used as a cushioning material in the interior lining, offering firm protection for your notebook PC.
- A slim type bag that still looks slim and stylish even with a PC inside.
- Comes with two front pockets, allowing you to neatly store an AC adapter and other accessories in one and smartphones and portable game devices in the other.
- The front pockets are made with low-resilience polyurethane – excellent in shock absorption.
- The grey interior lining makes it easier to find what you want when there are a lot of things in the bag.
- The soft handles prevent your hand from hurting when carrying heavy items.
- Comes with a detachable shoulder strap so you can carry it either on your hand or on your shoulder.

SPECIFICATIONS

- Bag type: briefcase
- Carry type: 2 way (shoulder bag and hand bag)
- Main material type: polyester
- Chambers: one
- Dimensions: W 410 × D 70 × H 310 mm (excluding handle)
- Internal dimensions: W 385 × D 45 × H 300 mm
- PC storage dimensions: W 385 × D 45 × H 300 mm
- Pocket (front area): zipper pocket × 2, accessory pocket × 2
- Shoulder strap: detachable (length: 820 mm to 1470 mm)
- Materials: polyester
- Weight: 560 g
- Accessories: shoulder strap × 1

PC | Accessories | Bag

ZSB-IBH001 series [Japanese Packaging]

ZEROSHOCK inner bag with handles (for notebook PCs up to 11.6 inches)

A "ZEROSHOCK" inner bag with handles, making it convenient for carrying around. Provides excellent absorption to protect your notebook PC from impacts.

ZSB-IBH001BK

ZSB-IBH001WH

FEATURES

- Uses low-resilience polyurethane shaped as a wave in order to absorb any shocks effectively.
- Despite having enough thickness to absorb any shocks from outside, the bag remains light due to its reduced volume.
- The handles make it easy to carry around or take it out of the bag.
- The handles provide a firm grip and can be folded down to fit nicely into the bag.
- Uses velvet-like materials inside the inner bag to protect stored items softly.
- Smooth opening with double zippers allowing PCs to be taken out easily.
- Comes with a front pocket where you can neatly store various accessories, such as an AC adapter.
- The surface of the case uses water repellent PVC (polyvinyl chloride) material.
- It can store a notebook PC up to 11.6 inches wide.

SPECIFICATIONS

- Main material type: PVC
- Chambers: one
- Dimensions: W 310 × D 35 × H 235 mm

  * The PC storage depth is greater than the actual depth of the inner bag due to the stretchy characteristics of the material.
- PC storage dimensions: W 290 × D 45 × H 215 mm

  * Supported device reference – notebook PCs with 11.6-inch wide LCD screen

  * This is only a reference. A notebook PC with a special device or case attached may not be used with the product. Make sure to check the storage dimensions of the product and your device before purchasing.
- Pocket (front area): zipper pocket × 1
- Surface coating: water-repellent
- Materials: PVC
- Weight: 328 g

ZSB-IBUB02BK [Japanese Packaging]

ZEROSHOCK inner case for Ultrabook

A slim "ZEROSHOCK" inner case providing excellent absorption to protect your Ultrabook from impacts.

ZSB-IBUB02BK

FEATURES

- Uses low-resilience polyurethane shaped as a wave in order to absorb any shocks effectively.
- Despite having enough thickness to absorb any shocks from outside, the bag remains light due to its reduced volume.
- Uses velvet-like materials inside the inner case to protect stored items softly.
- Smooth opening with double zippers allowing PCs to be taken out easily.
- The surface of the case uses water-repellent, high quality material.
- Comes with a front pocket where you can neatly store various accessories.

SPECIFICATIONS

- Main material type: PVC
- Chambers: one
- Dimensions: W 356 × D 28 × H 258 mm (excluding protrusions)
- Internal dimensions: W 330 × D 25 × H 230 mm
- PC storage dimensions: W 330 × D 25 × H 230 mm
  * Supported device reference: 13.3-inch wide Ultrabook * information as of July, 2012.
- Pocket (front area): zipper pocket × 1
- Surface coating: water-repellent
- Materials: surface – PVC; inside – polyester; core material – low-resilience polyurethane

CK-AL100SET [Japanese Packaging]

Cleaning kit

Cleaning liquid for electronic equipment.

CK-AL100SET

FEATURES

- Powerful ion power cleaning using sodium bicarbonate electrolysis water.
- A mix of baking soda and ion-exchanged water, without using a surfactant, that uses sodium bicarbonate electrolytic water obtained by electrolysis.
- Cleans strong stains, such as those from tobacco and the grease from finger marks, with ion power.
- Leaves an anti-static effect behind after wiping, so dust does not stick easily.
- Sterilization effect.

  * Please do not use it on displays or the filters of electronic devices as it may damage a surface coating.

SPECIFICATIONS

- Volume: 100 ml
- Weight: 201 g
- Contents: cleaning cloth (290 x 300 mm) x 1, case x 1
- Dimensions: 136 x 45 x 210 mm
- Environmental considerations: primary component – sodium bicarbonate electrolysis water, limonene, ethanol (alcohol)

CK-DP60SET [Japanese Packaging]

Cleaning kit

Cleaning liquid for displays.

CK-DP60SET

FEATURES

- Ion power cleaning without alcohol.
- Cleans fingerprints and finger marks on displays.
- Low irritative cleaner without alcohol and surfactant.
- Fingerprints and finger marks on the display can be removed simply by gently wiping with ion.
- Leaves an anti-static effect behind after wiping, so dust does not stick easily.
- Sterilization effect.

* Please do not use on plasma TVs as it may damage the coating of the surface treatment.

SPECIFICATIONS

- Volume: 60 ml
- Weight: 115 g
- Contents: cleaning cloth (140 x 150 mm) x 1, case x 1
- Dimensions: 100 x 36 x 210 mm
- Environmental considerations: primary component – potassium electrolytic ion water, plant extracts

MOH-012 series [Japanese Packaging]

"COMFY" wrist rest (double)

Wrist rest using low-resilience polyurethane. Disperses the load of the wrist, allowing for long periods of PC work. Comfortable and smooth thanks to a newly developed dimpled coating, providing a more comfortable operation of the keyboard.

MOH-012BK

MOH-012GY

FEATURES

- Resistance is very low and the pad has exellent shock absorption. As the decompression speed is slow against the pressure, it provides a superior load distribution performance. This allows it to fit the shape of the wrist and support PC work for a long period of time.
- Improved comfort and an airier feel thanks to a newly developed uneven coating.
- The back adheres itself well to the desk, preventing itself from sliding and moving around.

SPECIFICATIONS

- Material: surface of the wrist rest – polyurethane; base – elastomer
- Dimensions: W 285 x D 68 x H 26 mm
- Weight: 0.166 kg

• Company and product names are, in general, trademarks or registered trademarks of their respective companies. • iPhone, iPad, iPod, iPod touch, iPod nano, and iPod classic are trademarks of Apple Inc., registered in the U.S. and other countries. • Skype is a trade mark of Skype and ELECOM CO., LTD. is not affiliated, sponsored, authorized or otherwise associated by/with the Skype group of companies. • Xperia is a trademark or a registered trademark of Sony Mobile Communications AB. • The N mark is a trademark or registered trademark of the NFC Forum in the US and other countries. • The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by ELECOM CO., LTD. is under license. • "Google Play" and "Android" are trademarks of Google Inc. • "WALKMAN" and its logo are registered trademarks of Sony Corporation in Japan and the United States, and are registered trademarks or trademarks of Sony Corporation in other countries or territories.

MOH-014 series [Japanese Packaging]

dimpgel EX wrist rest

Use it once and you won't go back.
This is a high-performance fatigue-reduction hand rest using gel that's a delight to touch.

MOH-014BU

MOH-014GY

MOH-014WH

FEATURES

- Gel that's soft and supple as a baby's cheek supports your wrist in a pleasant and comfortable way.
- The gel is made of high-performance materials manufactured in Japan and boasting results from use in products for geriatrics, medicine, and even car racing. Owing to its excellent body pressure relief properties, it'll reduce the stress inflicted on the wrist that comes from long hours of input.
- Employs a high-quality Japanese-made synthetic leather with a soft and pleasant feel. Even if it gets grubby you can simply wipe it with a cleaner like ethanol anytime.
- The bottom is composed of a high-grip material, allowing you to get your job done comfortably without any desk-top slippage.

SPECIFICATIONS

- Dimensions: W 132 x D 76 x H 22 mm
- Materials: top – polyurethane leather; bottom – polyurethane; handrest filling – synthetic rubber
- Weight: 116 g

Mousepad "RIPLUN"

Mousepad made with silicone in soft colors and in a round shape.

MP-106BU

MP-106CR

MP-106GY

MP-106PN

FEATURES

- A silicone mousepad with soft colors and a round shaped design.
- A special treatment on the surface enables the pad to detect the minute movements of a mouse, allowing for a smooth operation.
- It has an unnoticeable curvature around the area that contacts the wrist in order to provide a gentle support.
- The highly adhesive nature of the silicone allows the mousepad to rest on the desk without slipping off, providing stable mouse operation.
- Suitable for a laser mouse, an optical mouse, a ball type mouse and various other types of mouse.
- A mousepad made in Japan with attention given to its color and shape.

SPECIFICATIONS

- Wrist rest type: integrated wrist rest
- Material: silicone
- Mousepad surface dimensions (maximum): W 174 x D 150 mm
- Mousepad surface thickness (thickest part): 1.5 mm
- Wrist rest height (heighest part): 5 mm
- Dimensions: W 200 x D 200 x H 5 mm (thinnest part 1.5 mm)
- Weight: 80 g

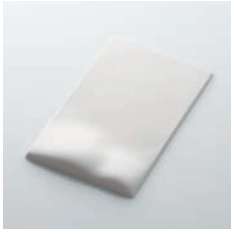
MP-115 series [Japanese Packaging]

Fatigue-relieving mousepad "FITTIO" (low)

Fatigue-relieving mousepad FITTIO – jointly developed in collaboration with the Yokohama Rehabilitation Center, this mousepad focuses on four main aspects designed to relieve fatigue from overworked hands, fingers, and shoulders.

MP-115BK



MP-115WH

FEATURES

- Fatigue-relieving mousepad FITTIO – featuring four design aspects for relieving the stress caused when operating a mouse.
- The surface of the mousepad features a 1.5° slope so the body's skeletal structure can maintain a natural angle, all the way from the wrist to the arm and shoulders.
- The height of the mousepad surface and the hand rest area is set at a height of 9 mm, ideal for people who normally feel uncomfortable with the height of traditional mousepads with hand rests, or people who use flat mousepads.
- The shape of the hand rest is designed to fit gently around the hand in order to provide the max. dispersion of body pressure.
- The interior is made with EXGEL®, a high-performance material made in Japan, used in products across a wide variety of fields, incl. medical care, welfare, and racing cars. Its excellent body pressure dispersion capability is effective for reducing stress on the wrist.
- The surface is made of high quality synthetic leather, a material also used in medical care. If dirty, it can be easily wiped with water, detergent, or alcohol, making it easy to keep clean.
- FITTIO was jointly developed with the Yokohama Rehabilitation Center.
- A mousepad made in Japan, meticulously designed to the finest detail.

SPECIFICATIONS

- Wrist rest type: integrated wrist rest
- Materials: surface – polyurethane synthetic leather;
  back surface – polyurethane; hand rest – synthetic rubber
- Mousepad surface dimensions (max.): W 135 x D 150 mm
- Mousepad surface thickness (thickest part): 7 mm
- Wrist rest height (highest part): 18 mm
- Dimensions: W 135 x D 220 x H 18 mm
- Weight: 205 g

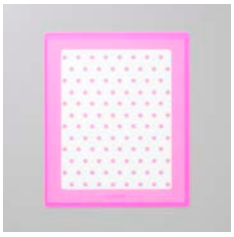
MP-117 series [Japanese Packaging]

Frame mousepad

Frame photos, postcards and notes.
A mousepad with a special surface treatment supporting comfortable mouse operation.

MP-117A



MP-117B

FEATURES

- The mousepad has two layers of material that separate so you can frame photos, postcards and notes in-between.
- Mousepads with popular patterns and colors to add to your stationary collection.
- A special uneven treatment on the surface enables the pad to detect the minute movements of a mouse, allowing for a smooth operation.
- Suitable for a laser mouse or an optical mouse.
- The bottom is composed of a highly adhesive non-slipping material, Sof-peel, allowing the mousepad to rest on the desk without sliding around.

SPECIFICATIONS

- Wrist rest: none
- Material: core material – PET (Polyethylene terephthalate); surface – UV resin; back surface - olefin-based sheet
- Mousepad surface dimensions (maximum): W 142 × D 172 mm
- Mousepad surface thickness (thickest part): 0.5 mm
- Dimensions: W 150 x D 180 x H 0.5 mm
- Weight: 40 g
- Conforms to Japanese environmental law.
  * in compliance with the standard for 'stationery and mousepads' in the Act on Promotion of Procurement of Eco-Friendly Goods and Services by the State and Other Entities (Act on Promoting Green Purchasing) as of April 2008.

MP-BO series [Japanese Packaging]

Botanical pattern mousepad

A colorful mousepad with botanical pattern that adds a natural and stylish touch to your desk.

MP-BOBU

MP-BOGN

MP-BOPN

MP-BOWH

MP-BOYL

FEATURES

- A mousepad with a colorful botanical print.
- Adds a natural and stylish touch to your desk.
- Finished with anti-bacterial treatment on the surface, keeping it clean and ready to use anytime.
- The surface has a special ruggedness treatment, creating a three-dimensional uneven pattern, which accurately detects the movement of a mouse, providing the mouse with excellent operability.
- The back of the mousepad is made of a highly adhesive non-slip material called "Sof-peel", adhering itself well even to your laptop, making it portable as well.
- Can be used with almost any mouse.

  * Some mouses may not function correctly, depending on the specifications or individual nature of the mouse.

SPECIFICATIONS

- Wrist rest: none
- Anti-bacterial treatment: done
- Material: core material - PET (Polyethylene terephthalate); surface - UV resin; back surface - olefin-based sheet
- Mousepad surface dimensions (maximum): W 144 x D 174 mm
- Mousepad surface thickness (thickest part): approx. 0.5 mm
- Dimensions: W 150 x D 180 x H 0.5 mm
- Weight: 19 g
- Conforms to Japanese environmental law.

  * in compliance with the standard for 'stationery and mousepads' in the Act on Promotion of Procurement of Eco-Friendly Goods and Services by the State and Other Entities (Act on Promoting Green Purchasing) as of April 2008.

PC | Accessories | Cover

PKU-FREE series [Japanese Packaging]

Keyboard cover

Super-fit keyboard cover sheet for netbook PCs and UMPCs that fits any shape of keyboard.

PKU-FREE2

PKU-FREE3

FEATURES

- Super-fit keyboard cover sheet for netbook PCs and UMPCs that protects the keyboard not only from dust but also from liquid spill.
- Featuring a new high performance material combining the durability and flexibility of polyurethane elastomer and the self-adhesiveness and softness of silicone.
- With the keyboard cover's flexibility and smoothness, a natural key touch operation is achieved without interfering with other keys.
- With the self-adhesive rear surface, it sticks perfectly to your keyboard. And with the double-sided tape the corners can be firmly applied, providing comfortable typing.
- It may not be applied well to surfaces with a textured finish, such as grain processing or aluminum casing, but it still has an anti-slip effect.
- Free-cut type waiting to be shaped to your requirements. Simply cut the cover to suit your keyboard.
- The peel-off sheet has grid lines to guide your cutting.
- Treated with antibacterial finish, preventing discoloration and deterioration due to the growth of bacteria, such as E. coli and Staphylococcus aureus.

  * based on JIS Z 280.
- Featuring a high light-resistance level that has passed a 78-hour light-resistance test, preventing yellowing caused by ultraviolet rays.

  * 20 hours of use equals one year's worth of radiation. Other conditions associated with yellowing are not considered.
- It contains no chemical compound of chlorine that produces dioxin when burned.

SPECIFICATIONS

PKU-FREE2

- Supported devices: telephones, fax machines, cash registers, calculators, remote controls, etc
- Dimensions: W 350 × D 250, thickness 0.15 mm
- Material: silicone-modified thermoplastic polyurethane elastomer
- Anti-bacterial treatment: done

PKU-FREE3

- Supported devices: telephones, calculators, remote controls, etc. with an operation panel up to 270 mm wide and 210 mm deep.

  * Use the included double-sided tape to secure the cover better.
- Dimensions: W 270 × D 210, thickness 0.15 mm
- Material: silicone-modified thermoplastic polyurethane elastomer
- Anti-bacterial treatment: done
- Accessories: double-sided tape × 4

M-CC1BR-G series [English Packaging]

Bluetooth® wireless mouse "CAPCLIP"

A new design of mobile mouse - small when carried around, big when in use. Bluetooth® wireless mouse CAPCLIP with built-in IR LED. Store it inside the cap and attach it with a clip while on the move.

M-CC1BRBU-G

M-CC1BRPN-G

M-CC1BRWH-G

M-CC1BRYL-G

FEATURES

- Bluetooth® wireless mouse "CAPCLIP", 3-button type with IR LED
- Mounting the mouse on the cap allows you to operate it as comfortably as if you were using a small sized mouse.
- When not in use, you can take off the cap and store the mouse inside it. This protects the mouse from dust, dirt, and from becoming damaged.
- The cap has a clip that you can affix to a variety of places, such as pockets or PCs, making it easier to carry around.
- Has a built-in lithium-ion battery that can be recharged multiple times, and one full charge can last you approximately one month.
- Has a low-consumption IR LED.
- Compatible with the Bluetooth® 3.0 standard. As long as you are using a PC that can support the Bluetooth® HID profile, you can use the mouse without the need of a receiver. It is also perfect for devices offering very few USB ports, such as Ultrabooks™ and tablet PCs.

  * Even with a PC that does not support the Bluetooth® HID profile, you can still use this product by using a compatible Bluetooth® adapter.
- Usable up to a distance of approx. 10 m on a non-magnetic surface (e.g. a wooden desk), and up to 3 m on a magnetic surface (e.g. a metal desk). (Values indicated are those obtained by ELECOM)
- Provides a resolution of 1200 dpi that allows you to use the mouse smoothly and comfortably.
- Power button on the back to avoid consuming battery power when not necessary.
- A power indicator light letting you know when the battery needs replacing.

SPECIFICATIONS

- Supported devices: Windows PC and Macintosh supporting Bluetooth® HID profile
- Supported OS: Windows RT 8.1, Windows 8.1, Windows 7, Windows Vista, Macintosh OS X 10.9 * Updates for each new version of the OS or the installation of a service pack might be required.
- Conformity standards: Bluetooth® 3.0 Class2, profile HID (Human Interface Device)
- Resolution: 1200 dpi
- Communication method: FHSS (frequency hopping spread spectrum)
- Radio frequency: 2.4 GHz band
- Radio wave outreach: approx. 10 m on non-magnetic surfaces (wooden desks, etc.) approx. 3 m on magnetic surfaces (steel desks, etc.)
- Reading method: IR optical sensor
- Light beam type: invisible wavelength region
- Buttons: 3 * incl. wheel button
- Wheel: 1
- Continuous operating time: approx. 18 hours
- Continuous standby time: approx. 36 days
- Estimated battery life: approx. 32 days

* When the computer is used for 8 hours a day, with 5% of that time spent operating the mouse

- Power supply (mouse): built-in rechargeable lithium-ion battery
- Dimensions (mouse): operated – W 41.0 x D 87.0 x H 30.3 mm
  stored – W 41.0 x D 52.0 x H 30.3 mm
- Size category: operated – size S; stored – size SS
- Weight (mouse): approx. 40 g
- Accessories: charger cable [USB A ⇔ micro-B] (cable length: 15 cm) x 1, user documentation x 3

M-XG1DB-G series [English Packaging]

5-button Blue LED wireless mouse "EX-G" (size M)

An almost outrageously superb comfort when holding it in your palm - a design born straight from the shape of your hand. The EX-G, a Blue LED, 2.4 GHz wireless, 5-button mouse.

M-XG1DBBK-G

M-XG1DBRD-G

M-XG1DBSP-G

FEATURES

- The EX-G, 5-button mouse featuring a design born straight from the shape of your hand, giving you an incredibly comfortable feel when you are holding it.
- Designed with a focus on the most frequently used fingers, the index and ring fingers, ensuring it fits perfectly with the 4 main points of contact: the proximal phalanx, adductor pollicis muscle/abductor pollicis brevis muscle, middle phalanx, and metacarpal bones.
- The Blue LED light reflects accurately even on rough or dusty surfaces, allowing you to use the mouse comfortably wherever you are.
- A 5-button mouse with forward and back buttons that allow you to navigate the web more efficiently.
- The side buttons are placed on the extended line of the curved surface of the grip area, allowing you to slide your fingers and operate the mouse intuitively.
- The left and right buttons are highly reliable in terms of durability, allowing you to make comfortable clicking operations provided by switches manufactured by the world renowned company OMRON.
- You can change the assignment of the functionality of the mouse buttons using the ELECOM Mouse Assistant software, which is available for free download.
- Featuring a resolution of 1600 dpi for smooth and comfortable mouse movements.
- Made with a wide 7.0 mm wheel that is close to the width of your fingertips, and which is easy to rotate.
- The sides of the main body fit well and feel comfortable under the fingers, and feature rubber grips that allow you to hold the mouse firmly.
- Comes in a medium size that fits perfectly and comfortably in your hand.
- The wireless functionality uses the 2.4 GHz band, allowing you to use the mouse at approximately 10 m on non-magnetic surfaces, and approximately 3 m even on magnetic surfaces, such as steel desks.(Based on ELECOM test results)
- Uses a micro-receiver the same size as a small coin, which is so small that you can leave it plugged into the USB port of your notebook PC during transport without it getting in the way.
- The receiver can be stored inside the main body of the mouse, making it easy to carry around and reducing the risk of loss.
- The bottom of the main body has a power switch that prevents the battery from becoming depleted when the mouse is not in use.
- Includes a remaining battery indicator light that notifies you when it is time to change the battery.

SPECIFICATIONS

- Supported devices: Windows PC, Macintosh, and PlayStation® 3 equipped with USB interface
- Supported OS: Windows RT to RT8.1, Windows 8 to 8.1, Windows 7 (to SP1), Windows Vista, Windows XP (SP2 to SP3), Mac OS X 10.6 to 10.6.8, OS X 10.7 to 10.7.5, OS X 10.8 to 10.8.4, OS X 10.9, PlayStation® 3 (system software ver. 4.46)
- Resolution: 1600 dpi • Communication method: GFSK
- Frequency: 2.4 GHz band
- Radio wave outreach: approx. 10 m on non-magnetic surfaces (wooden desks, etc.); approx. 3 m on magnetic surfaces (steel desks, etc.)
- Reading method: IR optical sensor
- Light beam type: visible wavelength region
- LED color: blue • Buttons: 5 * incl. wheel button • Wheel: 1
- Continuous operating time: approx. 152 hours
- Continuous standby time: approx. 220 days
- Estimated battery life: approx. 246 days

* When computer is used for 8 hours a day, with 5% of that time spent operating mouse.

- Power supply (mouse): AAA alkaline battery, AAA manganese battery or AAA nickel-metal hydride battery x any two of these
- Rated voltage (mouse): 3V
- Dimensions (mouse): W 70.0 x D 110.0 x H 40.0 mm
- Size category: size M
- Weight (mouse): approx. 81 g * excl. batteries
- Accessories: AAA alkaline dry cell batteries for confirming operability x 2, user documentation x 3
- Interfaces: USB
- Connector type: USB (A) male
- Receiver storage: possible
- Dimensions (receiver): W 15.0 x D 18.0 x H 6.0 mm
- Weight (receiver): approx. 2g

PC | Peripheral | Mouse

M-XG2UB-G series [English Packaging]

5-button Blue LED wired mouse "EX-G"(size L)

An almost outrageously superb comfort when holding it in your palm - a design born straight from the shape of your hand. The EX-G, a Blue LED, 5-button wired mouse.

M-XG2UBBK-G

M-XG2UBRD-G

M-XG2UBSP-G

FEATURES

- The EX-G, 5-button mouse featuring a design born straight from the shape of your hand, giving you an incredibly comfortable feel when you are holding it.
- Designed with a focus on the most frequently used fingers, the index and ring fingers, ensuring it fits perfectly with the 4 main points of contact: the proximal phalanx, adductor pollicis muscle/abductor pollicis brevis muscle, middle phalanx, and metacarpal bones.
- The Blue LED light reflects accurately even on rough or dusty surfaces, allowing you to use the mouse comfortably wherever you are.
- A 5-button mouse with forward and back buttons that allow you to navigate the web more efficiently.
- The side buttons are placed on the extended line of the curved surface of the grip area, allowing you to slide your fingers and operate the mouse intuitively.
- The left and right buttons are highly reliable in terms of durability, allowing you to make comfortable clicking operations provided by switches manufactured by the world renowned company OMRON.
- You can change the assignment of the functionality of the mouse buttons using the ELECOM Mouse Assistant software, which is available for free download.
- The top of the main body has a pointer speed change button that allows you to switch the mouse's cursor speed between the three values of 800, 1200, and 1600 dpi, depending on the purpose of use.
- Made with a wide 7.0 mm wheel that is close to the width of your fingertips, and which is easy to rotate.
- The sides of the main body fit well and feel comfortable under the fingers, and feature rubber grips that allow you to hold the mouse firmly.
- Comes in a large size that fits steadily and comfortably in your hand.

SPECIFICATIONS

- Supported devices: Windows PC, Macintosh, and PlayStation® 3 equipped with USB interface
- Supported OS: Windows RT to RT8.1, Windows 8 to 8.1, Windows 7 (to SP1), Windows Vista, Windows XP (SP2 to SP3), Mac OS X 10.6 to 10.6.8, OS X 10.7 to 10.7.5, OS X 10.8 to 10.8.4, OS X 10.9, PlayStation® 3 (system software ver. 4.46)
- Resolution: 800/1200/1600 dpi (switchable)
- Reading method: IR optical sensor
- Light beam type: visible wavelength region
- LED color blue
- Buttons: 5 * incl. wheel button
- Wheel: 1
- Size category: size L
- Accessories: user documentation x 3
- Interfaces: USB
- Connector type: USB (A) male
- Power supply: USB bus power
- Rated voltage: 5V
- Dimensions: W 81.0 x D 119.0 x H 41.2 mm
- Cable length: approx. 1.5 m
- Weight: approx. 114 g (incl. cable)

M-XG4DB-G series [English Packaging]

5-button Blue LED wireless mouse "EX-G"(size S)

A new mouse in a mini-size design born straight from the shape of your hand, featuring new comfortable ways of holding it: the pinching grip, and the covering grip. The EX-G, a Blue LED, 5-button wireless mini mouse that can be used comfortably wherever you are.

M-XG4DBBK-G

M-XG4DBRD-G

M-XG4DBSP-G

FEATURES

- The comfortable pinching grip has been designed with a shape and angle that is perfectly suited to the 5 points of the distal phalanges, allowing the mouse to be operated with the fingertips while keeping the flexor retinaculum as the axis.
- The comfortable covering grip has been designed with a shape and angle to fit the 4 points of the hand's muscles and skeletal structure perfectly.
- The Blue LED light reflects accurately even on rough or dusty surfaces, allowing you to use the mouse comfortably wherever you are.
- A 5-button mouse with forward and back buttons that allow you to navigate the web more efficiently.
- The side buttons are placed on the extended line of the curved surface of the grip area, allowing you to slide your fingers and operate the mouse intuitively.
- The left and right buttons are highly reliable in terms of durability, allowing you to make comfortable clicking operations provided by switches manufactured by the world renowned company OMRON.
- You can change the assignment of the functionality of the mouse buttons using the ELECOM Mouse Assistant software, which is available for free download.
- Featuring a resolution of 1600 dpi for smooth and comfortable mouse movements.
- The sides of the main body fit well and feel comfortable under the fingers, and feature rubber grips that allow you to hold the mouse firmly.
- The wireless functionality uses the 2.4 GHz band, allowing you to use the mouse at approximately 10 m on non-magnetic surfaces, and approximately 3 m even on magnetic surfaces, such as steel desks.(Based on ELECOM test results)
- Uses a micro-receiver the same size as a small coin, which is so small that you can leave it plugged into the USB port of your notebook PC during transport without it getting in the way.
- The receiver can be stored away inside the main body of the mouse, making it easy to carry around and reducing the risk of loss.
- The bottom of the main body has a power switch that prevents the battery from becoming depleted when the mouse is not in use.
- The receiver can be stored inside the main body of the mouse, making it easy to carry around and reducing the risk of loss.
- The bottom of the main body has a power switch that prevents the battery from becoming depleted when the mouse is not in use.
- Includes a remaining battery indicator light that notifies you when it is time to change the battery.

SPECIFICATIONS

- Supported devices: Windows PC and Macintosh equipped with USB interface
- Supported OS: Windows RT8.1, Windows 8.1, Windows 7, Windows Vista, Windows XP, Mac OS X 10.6, OS X 10.7, OS X 10.8, OS X 10.9 * Update for each new version of the OS or the installation of a service pack might be required.
- Resolution: 1600 dpi • Communication method: GFSK
- Frequency: 2.4 GHz band
- Radio wave outreach: approx. 10 m on non-magnetic surfaces (wooden desks, etc.); approx. 3 m on magnetic surfaces (steel desks, etc.)
- Reading method: IR optical sensor
- Light beam type: visible wavelength region
- LED color: blue • Buttons: 5 * incl. wheel button • Wheel: 1
- Continuous operating time: approx. 180 hours
- Continuous standby time: approx. 220 days
- Estimated battery life: approx. 273 days * When computer is used for 8 hours a day, with 5% of that time spent operating mouse.
- Power supply (mouse): AAA alkaline battery, AAA manganese battery or AAA nickel-metal hydride battery x any two of these
- Rated voltage (mouse): 3V
- Dimensions (mouse): W 64.7 x D 90.2 x H 38.2 mm
- Size category: size S
- Weight (mouse): approx. 60 g * excl. batteries
- Accessories: AAA alkaline dry cell batteries for confirming operability x 2, user documentation x 3
- Interfaces: USB • Connector type: USB (A) male
- Receiver storage: possible
- Dimensions (receiver): W 15.0 x D 18.0 x H 6.0 mm
- Weight (receiver): approx. 1 g

M-XT1DRBK-G [English Packaging]

Wireless trackball

A trackball with reliable basic functions and unprecedented new features. A completely new type of wireless trackball, featuring speed reduction/change switches for the pointer, and a tilt wheel.

M-XT1DRBK-G

FEATURES

- A wireless trackball with reliable basic functionality and new functionality as never seen before.
- A speed reduction switch that slows down the speed of the pointer while you are pressing down. This functionality is handy when clicking on small areas that make it difficult to control the mouse, allowing you to move the pointer smoothly.
- A built-in tilt wheel that allows you to scroll left and right by simply tilting the wheel in each direction. This functionality is extremely handy when scrolling horizonally long spreadsheets, such as in Excel.
- Includes a speed change switch with two values for swapping the pointer's movement speed between 1500 and 750 dpi.
- The sensor that detects the trackball's movements has a gaming-grade, highly efficient optical sensor to provide a pointer with excellent response.
- Forward and back buttons that allow you to navigate the web more efficiently.
- You can change the assignment of the functionality to the mouse buttons using the ELECOM Mouse Assistant software, which is available for free download.
- The left and right buttons, and the deceleration switch, are manufactured by the world-renowned company OMRON and are highly reliable in terms of durability, and also allow for comfortable clicking operations.
- Designed so the ball can be removed from the hole at the bottom, allowing you to carry out maintenance easily on the ball and the internal ball compartment.
- Designed with a focus on the hand's muscles and skeletal structures that come into contact with the mouse. The mouse's hollows and bulges allow your hand to rest more comfortably on the mouse and make it much easier to use.

SPECIFICATIONS

- Interface: USB • Connector type: USB (A) male
- Supported devices: Windows PC and Macintosh equipped with a USB interface
- Supported OS: Windows RT8.1, Windows 8.1, Windows 7, Windows Vista, Macintosh OS X 10.9 * Update for each new version of the OS or the installation of a service pack might be required. * The right and left scrolling is not available on Windows RT8.1.
- Resolution: 750/1500 dpi (switchable) • Communication method: GFSK
- Radio frequency: 2.4 GHz band
- Radio wave outreach: 3 m on magnetic surfaces (steel desks, etc.)
  10 m on non-magnetic surfaces (wooden desks, etc.)

U2H-SN4B-G series [English Packaging]

4 port USB 2.0 hub

Compact stick type USB 2.0 hub for adding extra ports to your PC.

U2H-SN4BF1BK-G

U2H-SN4BF2WH-G

FEATURES

- USB 2.0 hub you can plug into your PC to turn one port into four.
- A compact stick type that does not get in your way.
- The stick has a total of four ports, three in the front and one on the side, making it convenient to use with a wide range of USB devices.
- It has a cable length of 7 cm, which is ideal for use with notebook PCs.
- A bus-powered model that doesn't require an AC adapter for charging,
- It has an LED light to indicate the connection status.

SPECIFICATIONS

- Interface: USB 2.0 (operates at USB 1.1 when connected to a USB 1.1 interface)
- Connector type: PC side (upstream port) – USB A (male) x 1, USB peripheral side (downstream port) – USB A (female) x 4
- Supported OS: Windows 8.1, 8, 7 (SP1)/Vista (SP2)/Mac OS X 10.6~10.6.8/OS X 10.7~10.7.5, 10.8~10.8.3, 10.9, 10.10
- Max. transfer speed: USB 2.0 high speed/480 Mbps (theoretical), USB 1.1 full speed/12 Mbps (theoretical)
- Number of upstream (PC side) ports: 1
- Number of downstream (peripheral side) ports: 4
- USB cable method: USB2.0
- USB cable length: approx. 7.0 cm (excl. connector)
- Power method: bus powered
- Possible current outputs: 4 ports total no more than 400 mA (under 100 mA per port)
- Dimensions: approx. W 87 x D 22 x H 12 mm (excl. cable)
- Weight: approx. 30 g
- Operating environment: temperature 5 ℃ to 40 ℃ , humidity 30 % to 80 % (without condensation)

U2H-YK4B series [Japanese Packaging]

USB 2.0 HUB (cable storage type)

Cable stores conveniently in the main body.
An exclusively bus-powered four-port USB hub.

U2H-YK4BBK

U2H-YK4BF1WH

U2H-YK4BPN

FEATURES

- A stylish, exclusively bus-powered four-port USB hub with connector cable that stores in the main body.
- A slim, compact design makes it convenient to store and carry.
- In addition to the three front ports, it also has one side port that makes it convenient to use with a wide range of USB devices.
- Exclusively bus-powered design means no AC adapter is needed.

SPECIFICATIONS

- Interface: USB 2.0 (operates compatibly as USB 1.1 when connected to a USB 1.1 interface)
- Connector type: PC end (upstream port) – USB A (male);
  USB device end (downstream port) – USB A (female) x 4
- Supported OS: Windows 8, 7 (incl. SP1), Vista (SP2), XP (SP3)/Mac OS X 10.6 to 10.6.8, 10.7 to 10.7.5, 10.8 to 10.8.2
- Max. transmission speed: 480 Mbps (theoretical value when operating in USB 2.0 high-speed mode), 12 Mbps (theoretical value when operating in USB 1.1 full-speed mode)
- Upstream (PC end) port count: 1
- Downstream (peripheral device end) port count: 4
- USB cable type: USB 2.0
- USB cable length: approx. 29 mm (excl. connector)
- Power supply: USB bus power
- Max. current supply: a total of 400 mA or less from four ports (100 mA or less from each port)
- Dimensions: W 65 x D 37 x H 9.5 mm (excl. cable)
- Weight: approx. 20 g
- Operating environment: temperature 5℃ to 40℃
  humidity 30% to 80% (no condensation)

PC | Peripheral | Memory card reader

MR-A39N series [Japanese Packaging]

Compact memory reader/writer

Compatible with major media and conveniently compact.
A mini-reader/writer with integrated cable design that makes it easy to carry.

MR-A39NBK

MR-A39NRD

MR-A39NWHF1

FEATURES

- A compact memory reader/writer compatible with major media formats, incl. the SD Memory Card, Memory Stick and Multimedia Card series (excl. MMCmicro).
- Read/write capability with a diverse 48-format range of media, it can be used with an additional six formats when adapters are used.
- Miniaturized media often used with cell phones, such as the microSD format, can be inserted without adapters.
- Compatibility with high-speed versions of media, incl. SDXC and SDHC Memory Cards, PRO HIGH SPEED SD Memory Cards, and Memory Stick PRO (High Speed), make it quick and easy to move and copy even large volumes of data.
- Compatible with MagicGate copyright protection.
- Integrated cable design eliminates the worry of losing cables.
- Powered through the USB connection, it does not need any external power source.
- No special driver installation is needed. It can be used simply by plugging it into the USB port.
- Compatible with Macintosh.
- Compatible with USB 2.0 (High-speed).

SPECIFICATIONS

- Interface: USB 2.0
- Max. transmission speed: 480 Mbps (theoretical value when operating in USB 2.0 high-speed mode)
- Connector type: USB A (male) x 1 • Number of slots: 4
- Compatibility Media (SD memory card): SD (HighSpeed, ProHighSpeed, Class2, 4, 6, 10), Wii/DSi, SDHC (Class2, 4, 6, 10, UHS-I), SDXC (UHS-I, UHS-Ⅱ)/miniSD, miniSDHC (Class2, 4, 6)*/TransFlash, microSD (UHS-I), microSDHC (Class2, 4, 6, 10), microSDXC (*) Adapter must be purchased separately.
- Compatibility Media (Multimedia card): MMC, MMC4.0, Secure MMC, RS-MMC, RS-MMC4.0/MMC micro (*) Adapter must be purchased separately.
- Compatibility Media (Memory stick): MS (MagicGate, MagicGate HighSpeed, Memory select function), MSPRO (HighSpeed), MS Duo (MagicGate, MagicGate HighSpeed), MSPRO Duo (HighSpeed, Mark2), MSPRO-HGDuo, MS ROM, MS micro (M2)*, MSDuo for PSP® (*) Adapter must be purchased separately.
- Compatibility Media (CompactFlash): CompactFlash (Type I) (3.3V)/ CompactFlash (Type II) (3.3V), CompactFlash (Copmatible with UDMA), Micro drive
- Compatibility (Windows OS): devices compatible with PC/AT machines running Windows 8.1, 8, Windows 7 (SP1), Vista (SP2)
  Compatibility (Mac OS): Mac OS X 10.6-10.6.8, 10.7-10.7.5, 10.8-10.8.3, 10.9
- Dimensions: W 59.0 x D 35.0 x H 13.0 mm (excl. cable)
- Weight: approx. 35 g
- USB cable length: approx. 50 cm (excl. connector)
- Power supply voltage: 5 V
- Operating environment: temperature 5℃ to 40℃
  humidity 30% to 80% (no condensation)
- Accessories: manual x 1

USB cable that converts a USB Type-C terminal to a USB 3.1 Standard-A terminal.

USB3-AFCM01WH

FEATURES

- A new standard USB Type-C connector that can be inserted either side facing up.
- This conversion adapter allows you to connect to various peripherals without USB Type-C terminals and if you use it in combination with a USB hub, it becomes even more expandable.
- Connectable to a USB 3.1, USB 3.0 or USB 2.0 cable with a Standard-A connector.
  * Data transmission speed and supply current are in accordance with the device used.
- Supports 5 Gbps high speed data transfer in compliance with USB 3.1 Gen 1 standard.
- It is possible to charge the connected device at a max. 5V and 3A.
  * The current value varies depending on the performance of your PC.
- Featuring gold-plated pins and connectors to prevent corrosion and lower signal degradation.

SPECIFICATIONS

- Connector type: Type-C (male) – USB 3.1 Standard-A (female)
- Supported devices: PCs with USB Standard-A terminals and peripheral devices with USB Type-C terminals
- Cable length: 8 cm * excl. connector
- Cable width: dia. 3.5 mm
- Conformity standards: USB 3.1 (Gen1)
- Data transmission speed: max. 5 Gbps * theoretical value
- Plug plating finish: gold plate pins
- Shield method: triple shielded
- Cable type: twisted pair cable (telecommunications line)

USB3-APCC series [Japanese Packaging]

USB 3.1 cable (Type-C – Type-C)

USB 3.1 cable with a USB Type-C connector, supporting the connection between devices with a USB Type-C terminal for ultra fast data transmission speed up to 10 Gbps.

USB3-APCC10WH
(cable length: 1.0 m)

USB3-APCC20WH
(cable length: 2.0 m)

FEATURES

- USB 3.1 cable that connects a PC with a USB Type-C terminal to a device with a USB Type-C terminal in order to charge power or transmit data.
- Supporting USB 3.1 which has transmission speeds up to 10 Gbps, which is 20 times faster than USB 2.0.
- A new standard USB Type-C connector that can be inserted either side facing up.
- It is possible to charge the connected device at a max. 5V and 3A.
  * The current value varies depending on the performance of your PC. USB PD (Power-Delivery) is not supported.
- Made with flame-resistant material to improve the level of safety.
- Featuring a triple shielded cable that protects the signal from outside noise interference.
- Featuring gold-plated pins to prevent corrosion and lower signal degradation.

SPECIFICATIONS

- Connector type: USB Type-C (male) – USB Type-C (male)
- Supported devices: compatible with PCs with USB Type-C terminals and peripheral devices with USB Type-C terminals.
- Cable length:
  1.0 m (USB3-APCC10WH),
  2.0 m (USB3-APCC20WH)
- Cable width: 4.5 mm
- Conformity standards: USB 3.1
- Data transmission speed: max. 10 Gbps * theoretical value
- Plug plating finish: gold plate pins
- Shield: triple
- Cable type: twisted pair cable (telecommunications line)
- Packaging: PET (Polyethylene terephthalate) box and paperboard

PM-A15LPVK series [Japanese Packaging]

Ultimate shell cover for iPhone 6s Plus and iPhone 6 Plus

A 0.8 mm-thick shell cover made with polycarbonate, providing not only thinness and lightness, but also robustness.

PM-A15LPVKCR

FEATURES

- Because the shell cover is incredibly thin, your smartphone will look like it has no cover at all. The areas for buttons and connectors are all nicely covered too. Made with polycarbonate, providing not only thinness and lightness, but also robustness.
- It is designed so slim that it is as if there is no cover at all.
- The areas for connectors and buttons are securely covered as well.
- Since it does not cover the LCD screen, it allows easy and comfortable text entry.
- You can view the screen, operate your smartphone and plug in a charging/ communication cable without removing the cover.
- You can also take photos without removing the cover.

SPECIFICATIONS

- Supported devices: iPhone 6s Plus/iPhone 6 Plus

PM-A15LTS series [Japanese Packaging]

TOUGH slim case for iPhone 6s Plus and iPhone 6 Plus

A thin and light shock-resistant case.

Tough slim case uniquely designed for efficiently absorbing shocks with its air cushion laid all around the edge.

PM-A15LTSBU

PM-A15LTSPN

PM-A15LTSWH

FEATURES

- Tough slim case that efficiently absorbs shocks with its built-in air cushion all around the edge.
- A case made of two types of material with different features in a special process, providing robustness and flexibility at the same time.
- A honeycomb structure is used on the inside of the case, successfully increasing its shock resistance while decreasing its weight.
- Featuring a stylish two-tone coloring design.
- Includes a silicone strap for drop prevention.
- Includes a three-layered shock adsorbing film for absorbing impacts and keeping the screen free of scratches and dirt.
- The film is a bubbleless type film that uses a special adhesive layer in which air bubbles will not appear over time.
- The film is a self-adhesive type that contains a silicone membrane on the adhesive side. No adhesive or dual-sided tape is used, so it can be directly applied, and re-applied, without dirtying the main body.
- You can view the screen, operate your smartphone and plug in a charging/communication cable without removing the case.
- Due to its structure, 'Edge Touch Gestures' may not work.

SPECIFICATIONS

- Supported devices: iPhone 6s Plus/iPhone 6 Plus
- Contents: case × 1, strap × 1, LCD protection film (shock absorbing) × 1
- Material: case – TPU (thermoplastic polyurethane), polycarbonate; strap – silicone
- Film material: surface – PET, polyurethane; application side – silicone membrane

PM-A15LZERO series [Japanese Packaging]

ZEROSHOCK case for iPhone 6s Plus and iPhone 6 Plus

A ZEROSHOCK case that protects iPhone 6s Plus/iPhone 6 Plus against impacts from any direction.

PM-A15LZEROBK

PM-A15LZEROBU

PM-A15LZERORD

PM-A15LZEROSV

PM-A15LZEROYL

FEATURES

- A six-layered shock adsorbing structure firmly protects iPhone from impacts.
- Highly shock absorbent, with its dampers on the four corners, the case is also prepared for the toughest of impacts when dropped.
- Featuring a double-layered structure with soft shock-absorbing material wrapped with a hard material.
- A highly shock absorbent honeycomb structure is used in the inside of the case where it connects to the rear of the main body.
- Includes a three-layered shock adsorbing film for absorbing impacts and keeping the screen free of scratches and dirt.
- The film is a bubbleless type film that uses a special adhesive layer in which air bubbles will not appear over time.
- The film is a self-adhesive type that contains a silicone membrane on the adhesive side. No adhesive or dual-sided tape is used, so it can be directly applied, and re-applied, without dirtying the main body.
- You can view the screen, operate your smartphone and plug in a charging/communication cable without removing the case.
- Has a strap hole so a strap can be attached for added safety.

SPECIFICATIONS

- Supported devices: iPhone 6s Plus/iPhone 6 Plus
- Contents: case × 1, LCD protection film (shock absorbing) × 1
- Material: TPU (thermoplastic polyurethane), polycarbonate
- Film material: surface – PET, polyurethane; application side – silicone membrane

PM-A15PVICBK [Japanese Packaging]

Shell cover for iPhone 6s and iPhone 6 (IC card storable)

A shell cover made with thin, light and durable polycarbonate that protects your iPhone from scratches.

PM-A15PVICBK

FEATURES

- A slim shell cover made with polycarbonate which can store IC cards while protecting your iPhone 6s/iPhone 6 from scratches and dirt without compromising its slim design.
- You can store IC cards in the space between the iPhone and the cover.
- There is a plate with a magnetic sheet, ready to use for IC cards.
- You can go through a ticket gate or make a payment just by holding your iPhone over the appropriate machines.
- The surface is treated to have a texture that prevents your iPhone from slipping out of your hand.
- It is designed to protect the built-in camera even when iPhone is placed with the camera side facing down.
- The rear side of the cover is constructed in a convex type rib, protecting the rear side as well as rear camera of your smartphone from scratches.
- This cover lets you slide your finger more comfortably across the screen, without catching, as it does not cover the edge of the LCD.
- You can plug a genuine iPhone cable into your smartphone, take photos and operate the smartphone without removing the cover.

SPECIFICATIONS

- Supported devices: iPhone 6s/iPhone 6
- Contents: cover × 1
- Material: cover – polycarbonate; plate – polycarbonate, magnetic material

PM-A15PVK series [Japanese Packaging]

Ultimate shell cover for iPhone 6s and iPhone 6

A 0.8 mm-thick shell cover made with polycarbonate, providing not only thinness and lightness, but also robustness.

PM-A15PVKBK

PM-A15PVKCR

FEATURES

- Because the shell case is incredibly thin, your smartphone will look like it has no cover at all. The areas for buttons and connectors are all nicely covered too. Made with polycarbonate, providing not only thinness and lightness, but also robustness.
- It is designed so slim that it is as if there is no cover at all.
- The areas for connectors and buttons are securely covered as well.
- Since it does not cover the LCD screen, it allows easy and comfortable text entry.
- You can view the screen, operate your smartphone and plug in a charging/ communication cable without removing the cover.
- You can also take photos without removing the cover.

SPECIFICATIONS

- Supported devices: iPhone 6s/iPhone 6

PM-A15TS series [Japanese Packaging]

TOUGH slim case for iPhone 6s and iPhone 6

A thin and light shock-resistant case.

Tough slim case uniquely designed for efficiently absorbing shocks with its air cushion laid all around the edge .

PM-A15TSBU

PM-A15TSDR

PM-A15TSGN

PM-A15TSPN

PM-A15TSRD

PM-A15TSWH

FEATURES

- Tough slim case that efficiently absorbs shocks with its built-in air cushion all around the edge.
- A case made of two types of materials with different features in a special process, providing robustness and flexibility at the same time.
- A honeycomb structure is used in the inside of the case, successfully increasing its shock resistance while decreasing its weight.
- Featuring a stylish two-tone coloring design.
- Includes a silicone strap for drop prevention.
- Comes with a three-layered shock adsorbing film for absorbing impacts and keeping the screen free of scratches and dirt.
- The film is a bubbleless type film that uses a special adhesive layer in which air bubbles will not appear over time.
- The film is a self-adhesive type that contains a silicone membrane on the adhesive side. No adhesive or dual-sided tape is used, so it can be directly applied, and re-applied, without dirtying the main body.
- You can view the screen, operate your smartphone and plug in a charging/ communication cable without removing the case.
- Due to its structure, 'Edge Touch Gesture' may be inoperable.

SPECIFICATIONS

- Supported devices: iPhone 6s/iPhone 6
- Contents: case × 1, strap × 1, LCD protection film (shock absorbing) × 1
- Material: case – TPU (thermoplastic polyurethane), polycarbonate; strap – silicone
- Film material: surface – PET, polyurethane; application side – silicone membrane

P-AW38FLBLAG, P-AW42FLBLAG [Japanese Packaging]

Blue-light-cut film for Apple Watch [38 mm], [42mm]

Bubbleless LCD protection film for Apple Watch, developed to protect your eyes from blue light by significantly reducing the amount of blue light emitted from the LCD screen.

P-AW38FLBLAG
(size: 38 mm)

P-AW42FLBLAG
(size: 42 mm)

FEATURES

- A blue-light-cut film that protects the Apple Watch LCD screen from scratches and dirt.
- The film is a bubbleless type film that uses a special adhesive layer in which air bubbles will not appear over time.
- If some bubbles remain after applying the film, use your finger to push them gently toward the edge of the film.
- A high gloss film that vividly illuminates the LCD screen.
- LCD protection film that cuts approx. 35 % of blue light emitted by the LCD screen.

  * It is said that blue light is able to pass the cornea and crystalline lens of the eye without being absorbed, and can end up reaching the retina, which can cause the retina to deteriorate.
- The film is designed not only to effectively cut blue light, but also to keep the natural appearance of the smartphone without altering the color on screen images.
- The surface is treated with a hard coat with the hardness value of 3H in order to protect the film from scratches. *The hardness value is an actual measurement.
- The film is a self-adhesive type that contains a silicone membrane on the adhesive side. No adhesive or dual-sided tape is used, so it can be directly applied, and re-applied, without dirtying the main body. The film recovers its adhesive properties by being washed with water.
- The protection film is precisely cut to the shape of Apple Watch and is ready to use straight out of the package.

  * The film is specifically prepared so that it does not cover the curvatures of the LCD corners.
- Operations with touch screen input are possible with the film on.

SPECIFICATIONS

- Supported devices: Apple Watch [38mm], [42 mm]
- Contents: LCD protection film (blue-light-cut, high gloss) × 1, dust removal sticker × 1, cleaning cloth × 1
- Material: application side – silicone; outer side – PET

P-SSN01 series [Japanese Packaging]

Selfie stick (standard type)

Take great self-shots with ease using this normal-type selfie stick, which allows photography using your smartphone from up to 100 cm away.

P-SSN01BK

P-SSN01PN

P-SSN01WH

FEATURES

- The selfie stick, which attaches to your smartphone, allows you to take "selfie" photos from up to 100 cm away, just as if you'd had someone take one for you.
- Adjustable between 23 cm and 100 cm.
- Adjustable 360 degrees horizontally and 180 degrees vertically, so you can take a photo from whatever your best angle may be.

  * Photography is done through the use of the smartphone's self-timer.
- The smartphone holder holds your smartphone with a firm grip, and the compact, reduced-space design reduces accidental screen input.
- Comes with a strap convenient both for carrying and for when in use.
- Also usable with self timer-equipped compact digital cameras (actual device 200 g or less).

SPECIFICATIONS

- Dimensions: selfie stick body – W45 x D18 x H230 mm; smartphone holder – W36 x D25 x H73.5 mm
- Maximum extendable length: 100 cm
- Minimum contractible length: 23 cm
- Load capacity: 200 g or less (actual device)
- Materials: selfie stick body – ABS, brass, silicon; smartphone holder – ABS, urethane; TPU strap – ABS, nylon
- Weight: 128 g
- Angle adjustment (at joint): back and front 180 degrees

MPA-AMBCL2U series [Japanese Packaging]

2A supported micro USB cable (slim type)

Made with a specially shaped micro-B connector that makes it quick and easy to connect. A slim micro-USB cable that can be used with a high-output AC charger or portable power charger to provide an extremely fast charge to your smartphone.

MPA-AMBCL2U12BK

MPA-AMBCL2U12BU

MPA-AMBCL2U12GN

MPA-AMBCL2U12PN

MPA-AMBCL2U12PU

MPA-AMBCL2U12WH

FEATURES

- Connects a PC, AC charger or portable power charger with a USB (A-type: female) interface to a device, such as a smartphone, with a USB (micro-B type: female) interface in order to transmit data or charge power.
- Designed to minimize voltage drops and able to utilize a smartphone's charging performance to the maximum.
- Considerably reduces charging time when used with a high-output AC charger or portable power charger.

  * The smartphone is required to support charges with an electric current of 1 A or higher.

  * In order to maintain safety, please use an AC charger or portable power charger with a rated output of 1.5 A or higher.
- Made with an easy-to-handle slim cable measuring 3.5 mm in diameter.
- Able to transfer data by connecting it to a PC, making it perfect for transferring image and data files from your smartphone.

  * Cannot provide fast charging speeds when connected to a PC. This is a slim cable that is easy to handle, measuring 3.5 mm in diameter.
- Supports the USB 2.0 standard, achieving a fast data transfer speed of 480 Mbps.
- Made with gold-plated pins that are rust-resistant and prevent signal degradation; designed to provide a high level of safety and durability.
- Made with a trapezoidal micro-B connector that is easy to insert and remove, and which makes it easy to use the right way up.
- Made with flame-resistant material to increase its level of safety.
- This is an environmentally friendly product that complies with the EU RoHS Directive (Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment).

SPECIFICATIONS

- Connector type: USB (A) male – USB (micro-B) male
- Supported devices: USB (A) male – PCs, power chargers, portable power chargers, etc. with a USB (A) port; USB (micro-B) male – smartphones, etc. with a USB (micro-B) port
- Cable length: 1.2 m
- Standard: USB 2.0 standard (HI-SPEED mode)
- Transmission speed: 480 Mbps
- Plug plating finish: gold-plated pins
- Function: To transfer data to devices such as PCs with a USB (A) port, and smartphones with a USB (micro-B) port, and charge devices, such as smartphones, with a USB (micro-B) port.

• Company and product names are, in general, trademarks or registered trademarks of their respective companies. • iPhone, iPad, iPod, iPod touch, iPod nano, and iPod classic are trademarks of Apple Inc., registered in the U.S. and other countries. • Skype is a trade mark of Skype and ELECOM CO., LTD. is not affiliated, sponsored, authorized or otherwise associated by/with the Skype group of companies. • Xperia is a trademark or a registered trademark of Sony Mobile Communications AB. • The N mark is a trademark or registered trademark of the NFC Forum in the US and other countries. • The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by ELECOM CO., LTD. is under license. • "Google Play" and "Android" are trademarks of Google Inc. • "WALKMAN" and its logo are registered trademarks of Sony Corporation in Japan and the United States, and are registered trademarks or trademarks of Sony Corporation in other countries or territories.

MPA-AMBR2U series [Japanese Packaging]

Micro USB cable supporting 2A (retractable type)

Made with a trapezoidal micro-B connector, which makes it easy to use the right side up.
Retractable micro USB cable provides ultra-fast charging to your smartphone when combined with a high output AC charger or portable power charger.

MPA-AMBR2U07BK

MPA-AMBR2U07WH

FEATURES

- Connects a PC, AC charger or portable power charger with a USB (A-type: female) interface to a device, such as a smartphone, with a USB (micro-B type: female) interface in order to transmit data or charge power.
- Designed to minimize voltage drops and able to utilize a smartphone's charging performance to the maximum.
- Considerably reduces charging time when used with a high-output AC charger or portable power charger.

  * The smartphone is required to support charges with an electric current of 1 A or higher.

  * In order to maintain safety, please use an AC charger or portable power charger with a rated output of 1.5 A or higher.
- Able to transfer data by connecting it to a PC, making it perfect for transferring image and data files from your smartphone.

  * Ultra-fast charging is not available when connected to a PC.
- Retractable type that is compact and portable.
- Stretch the connectors on both ends until the stopper mechanism clicks in order to adjust it to one of seven different lengths.
- Featuring a flat cable that is easily retracted.
- Supports 480 Mbps high speed data transfer in compliance with USB2.0 standard.
- Featuring gold-plated pins that resist corrosion and prevent signal degradation in order to improve durability and safety.
- Made with a trapezoidal micro-B connector that is easy to insert and remove, and which makes it easy to use the right way up.
- Made with flame-resistant material to improve the level of safety.
- An environmentally friendly product in compliance with EU's RoHS Directive on the Restriction of the use of certain Hazardous Substances.

SPECIFICATIONS

- Connector type: USB (A) male; USB (Micro-B) male
- Supported devices: USB (A) male – PCs, power chargers, portable power chargers, etc. with a USB (A) terminal; USB (Micro-B) male - devices, such as smartphones, with a USB (Micro-B) terminal
- Cable length: Max. 0.7 m
- Standard: complies with USB2.0 standard (HI-SPEED mode)
- Transmission speed: 480 Mbps
- Plug plating finish: gold-plated pin
- Shield: double
- Uses: connects a PC with a USB (A) terminal to a device, such as a smartphone, with a USB (micro-B) terminal in order to transmit data or charge power.

- Flexible slim cable with a diameter of 3.5mm
- Able to transfer data by connecting it to a PC, making it perfect for transferring image and data files from your smartphone.

  * ultra-fast charging is not available when connected to a PC. A slim type 3.5mm dia. cable which is easily retractable.
- Supports 480 Mbps high speed data transfer in compliance with USB2.0 standard.
- Featuring gold-plated pins that resist corrosion and prevent signal degradation to improve durability and safety.
- Made with a trapezoidal micro-B connector that is easy to insert and remove, and which makes it easy to use the right way up.
- Made with flame-resistant material to improve the level of safety.
- An environmentally friendly product in compliance with EU's RoHS Directive on the Restriction of the use of certain Hazardous Substances.

SPECIFICATIONS

- Connector type: USB (A) male - USB (micro-B) male
- Supported devices: USB (A) male – PCs, power chargers, portable power chargers, etc. with a USB (A) terminal; USB (Micro-B) male – devices, such as smartphones, with a USB (Micro-B) terminal
- Cable length:

  0.2 m (MPA-AMBX2U02)
  0.8 m (MPA-AMBX2U08)
  1.2 m (MPA-AMBX2U12)
- Standard: complies with USB2.0 standard (HI-SPEED mode).
- Transmission speed: 480 Mbps
- Plug plating finish: gold-plated pin
- Uses: connects a PC with a USB (A-type) terminal to a device, such as a smartphone, with a USB (micro-B type) terminal in order to transmit data or charge power.

TB-01GP series [Japanese Packaging]

Gadget pouch (small)

A semi-hard gadget pouch that can store items, such as portable power chargers and cables, all in one.

TB-01GPBK

TB-01GPRD

TB-01GPSV

FEATURES

- A generic gadget pouch that can store various gadgets, such as cables and portable power chargers.
- Made with ethylene vinyl acetate to protect the contents from impacts.
- A cushioning material used in the interior lining protects stored items from damage.
- Comes with two inner mesh pockets for keeping thick items, such as batteries.
- The divider inside comes with rubber straps to which you can neatly store cables and also has a pocket for storing items, such as memory cards.
- A smooth opening with double zippers allows items to be taken out easily.

SPECIFICATIONS

- Dimensions: W 163 × D 43 × H 110 mm
- Internal dimensions: W 140 × D 15 × H 75 mm
- Weight: 130 g
- Materials: surface – polyurethane; inside – polyester; core material – ethylene vinyl acetate

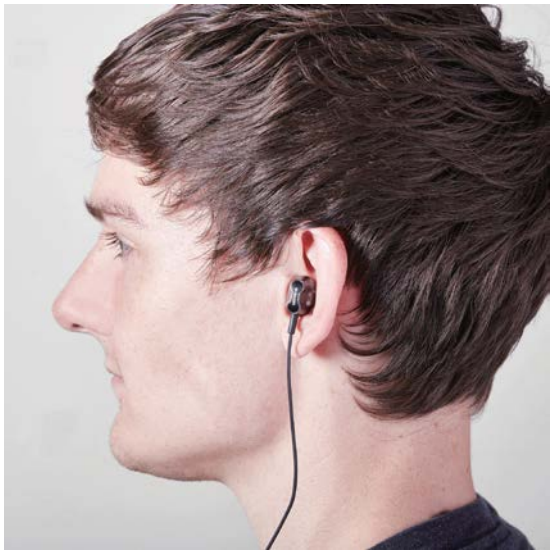
EHP-CA2D3510 series [Japanese Packaging]

Stereo headphones

Reproduces dynamic, natural sound. Equipped with two dynamic drivers which can reproduce sound with depth in the low to mid frequencies.



EHP-CA2D3510BK

EHP-CA2D3510RD

EHP-CA2D3510WH

FEATURES

- Two dynamic drivers with dia. 6mm that can reproduce delicate and balanced sound with depth in the low to mid frequencies
- The housing is designed to have more inner space for the 'sound amplification chamber', which enhances the audio effects created by the dual driver, delivering richer, extended sound.
- The silicone ear caps feature a double structure with differentiated firmness between the inside and the outside layers, preventing sound leakage while improving bass sound.
- The ear caps come in three generic sizes, S/M/L, so you can choose the best size to fit your ears.
- Featuring a durable, tangle-free line cable.
- The cable has a slider to prevent it from tangling.
- The cable has a cord clip, effective for reducing the noise caused by the cable bumping against other objects.
- Includes a pouch for storing your headphones, making them easier to carry around.
- Uses a "type-L" gold-plated plug for a compact connection with a device.

SPECIFICATIONS

- Sound system: airtight
- Fit style: in-ear type
- Driver unit: dynamic, dia. 6 mm (two on one side)
- Speaker input impedance: 10.6 Ω
- Sound pressure sensitivity: 104 dB/1 mW
- Maximum input power: 3 mW
- Frequency response: 20 Hz to 20 kHz
- Cable length: approx. 1.2m (Y-type)
- Plug type: dia.3.5 mm 4-conductor gold plate mini-plug (L-type)
- Dimensions: headset – W 13 x D 23 x H 18 mm (excl. cable)
- Weight: headset – approx. 4 g
- Accessories: ear caps x 3 (S/M/L), clip x 1, manual x 1
- Environmental considerations: RoHS

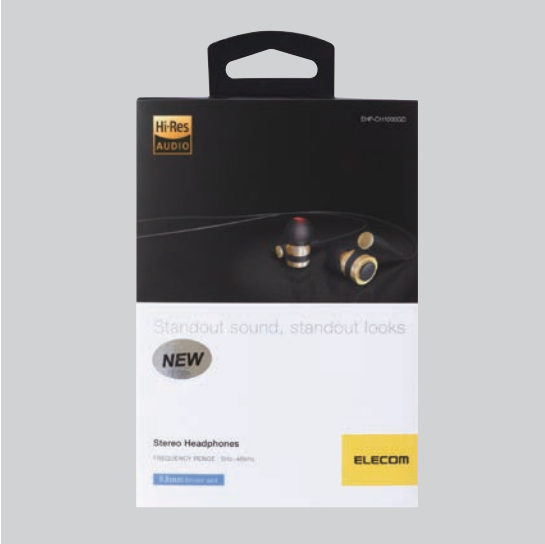
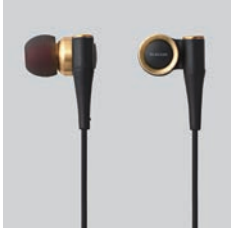
EHP-CH1000 series [Japanese Packaging]

Stereo headphones

High sound-quality stereo headphones that support high resolution music files, also known as hi-res audio. Stereo headphones made with a dia. 9.8 mm driver and a highly rigid brass housing that can reproduce subtle, high quality sounds.





CH1000GD

EHP-CH1000SVEHP-

FEATURES

- High sound-quality stereo headphones that support high resolution music files, also known as hi-res audio.
- Made with a dia. 9.8 mm driver that can reproduce strong sounds in the low ranges and subtle sounds in the mid to high ranges.
- Made with a highly rigid diaphragm designed with a driver with ribs featuring a radial structure in order to prevent abnormal vibrations, such as deformed membranes, divided membranes or rolling. This allows it to take the input and produce a linear output with little distortion.
- The housing is made with highly rigid brass, which shuts out any excess vibrations generated by the drive yoke.
- Made with a newly developed sound hole structure called a Magnetic Turbo Axial Port, which places the driver, ball piece and magnet along the same axis. This allows the headphones to respond smoothly when reproducing sounds from the low to high ranges.
- Newly designed deep-fitting ear caps allow for powerful bass by improving air tightness
- A differentiated firmness for the inside and outside of the ear caps to enable better sound quality and a snug fit. The two-stage depth adjustable construction provides comfort and improved air tightness.
- Includes three pairs of ear caps in different sizes so you can find the best fit (S/M/L).
- Made with a line cable that prevents it from becoming tangled.
- The cable has a slider for preventing it from tangling.
- Includes a cable keeper for adjusting the cable length and storing the cable.
- Includes a pouch for storing your headphones, making it easier to carry them around. The pouch is made of PU leather, and is resistant to dirt and easy to store and take out.
- Uses a "type-L" gold-plated plug for compact connection with a device.

SPECIFICATIONS

- Sound system: airtight
- Fit style: in-ear type
- Driver unit: dynamic, dia. 9.8 mm
- Speaker input impedance: 16 Ω
- Sound pressure sensitivity: 100 dB/1 mW
- Max. input power: 100 mW
- Frequency range: 5 Hz to 40 kHz
- Cable length: 1.2 m (Y-type)
- Plug: dia. 3.5 mm 3-conductor mini plug (L-type)
- Dimensions: W 11.2 x D 22.16 x H 26.91 mm (excl. cable)
- Weight: approx. 9 g (excl. cable)

EHP-CH3000 series [Japanese Packaging]

Stereo headphones

From its original and attractive design it provides high-resolution audio to the fullest, thanks to a rigid vibrating plate made with a multi-layered film.

EHP-CH3000BK

EHP-CH3000GN

FEATURES

- High quality stereo headphones that support high resolution music files, also known as hi-res audio.
- Made with a dia. 12.5 mm driver that can reproduce strong sounds in the low ranges and subtle sounds in the mid to high ranges.
- Featuring a rigid vibrating plate in a radial construction with 'Teijin®Tetoron®MLF', a PET (Polyethylene terephthalate) film developed by Teijin Limited, as the base material, reproducing sounds in rich low ranges and clean high ranges that naturally expand.
- Neodymium magnets are used to accelerate the vibration speed of the diaphragm so that even more powerful low sounds can be delivered.
- The "Magnetic Turbo Axial Port" design situates the driver, bowl and magnets along the same axes, allowing for a smooth response that spans from lows to peaks.
- Super-hard aluminum is used for the housings, shutting out excess vibration from the driver yokes and faithfully reproducing sound signals from the diaphragm, while achieving robustness and lightness.
- The "Depth Fit Earpiece" design features an enlarged tip for greater air-tightness, assuring the delivery of overwhelmingly powerful low sounds. A differentiated firmness for the inside and outside of the ear caps enables better sound quality and a snug fit.
- The two-stage depth adjustable construction provides comfort and improved air tightness.
- Includes three pairs of ear caps in different sizes so you can find the best fit (S/M/L)

SPECIFICATIONS

- Sound system: airtight
- Fit style: in-ear type

EHP-SPIN200 series [Japanese Packaging]

Stereo headphones for sports activities (in-ear type)

In-ear type stereo headphones equipped with earhooks and open ear caps to provide a firm and comfortable fit while allowing you to still hear ambient noise – perfect for use during physical activity, such as running.

EHP-SPIN200BK

EHP-SPIN200BU

EHP-SPIN200MX

EHP-SPIN200PN

EHP-SPIN200RD

EHP-SPIN200WH

FEATURES

- The ear caps are provided with pores to enable surrounding noise to be heard, perfect for use during physical activity, such as running.
  * when compared with general in-ear type headphones
- In-ear type that provides a great fit.
- Includes a pair of earhooks constructed in the 'double bend system', first gently fitting the shape of the ear and then, comfortably wrapping around the ear.
- A two-step bending design for the earhook reduces stress on the ears, allowing for long periods of use.
- Includes a cable keeper for adjusting the cable length and storing the cable.
- Reproduces well-balanced sound, from the low pitch to the high pitch.
- Includes three pairs of ear caps in different sizes so you can find the perfect fit for your ears (S/M/L).
- Uses a "type-L" gold-plated plug for a compact connection with a device.

SPECIFICATIONS

- Sound system: airtight
- Fit style: in-ear type
- Driver unit: dynamic, dia. 9 mm
- Speaker input impedance: 16 Ω
- Sound pressure sensitivity: 93 dB/1 mW
- Maximum input power: 10 mW
- Frequency response: 20 Hz to 20 kHz
- Cable length: approx. 1.2 m (Y-type)
- Plug type: dia. 3.5 mm 3-conductor mini-plug (L-type)
- Dimensions: W 14 × D 26.5 × H 19 mm (without earhook and excl. cable)
- Weight: approx. 12 g (excl. cable)
- Accessories: ear caps × 3 (S/M/L), earhook × 2, cable keeper × 1
- Environmental considerations: RoHS

AVD | Headphones/Headset/Mic | Wired headset for smartphone

EHP-BS100 series [Japanese Packaging]

Stereo headset for smartphones, 'AQUA'

A stereo headset, 'AQUA', equipped with a balanced armature (BA) driver manufactured by Knowles, a US company, reproducing clear and expanding mid- to high-pitch sounds as well as well-balanced low-pitch sounds.

EHP-BS100BK

EHP-BS100SV

FEATURES

- The BA driver has higher fidelity of the mid to high-pitch sounds and more precise vibration response, making it possible to reproduce sounds true to the original sound.
- Featuring the 'RAB series', a high performance BA driver, that covers sounds from mid- to high-pitch to low range frequencies.
- Super-hard brass is used for the housings, shutting out excess vibration from the driver yokes
- The housing is designed to have more inner space and strength for the 'sonic resonating structure', which enhances the audio effects created by the driver, delivering richer and extended sound.
- The silicone ear caps feature a double structure with differentiated firmness between the inside and the outside layers.
- The ear caps come in three generic sizes, S/M/L, so you can choose the best size to fit your ears.
- Uses a durable, tangle-free line cable.
- The cable has a slider for preventing it from tangling.
- Plug into a smartphone with a dia.3.5mm 4-conductor mini-plug to enjoy music as well as telephone conversations.
- The inline remote control with its built-in mic has slide switches for picking up/terminating calls and controlling volume.
- The cable has a cord clip, convenient to adjust the height of the microphone and effective for reducing the noise caused by the cable bumping against other objects.

  * Exclusively for 4-conductor mini plug smartphones. Some 4-conductor mini plug smartphones are not supported.

  * The call pick-up/termination switch cannot be used on Internet calls such as Skype™

  * You may be able to use the remote control function for playing music/movies with some smartphones. The operating procedure differs depending on the device.

  * The call pick-up/termination switch cannot be used on some applications.
- Includes a pouch for storing your headphones, making them easier to carry around. The pouch is made of PU leather, and is resistant to dirt and easy to store and take out.
- Uses a "type-L" gold-plated plug for compact connection with a device.

SPECIFICATIONS

- Sound system: airtight
- Fit style: in-ear type
- Driver unit: balanced armature (single)
- Speaker input impedance: 48 Ω
- Sound pressure sensitivity: 106 dB/1 mW
- Maximum input power: 40 mW
- Frequency response: 20 Hz to 20 kHz
- Cable length: 1.2 m (Y-type)
- Plug type: Plug type: dia.3.5 mm 4-conductor gold plate mini-plug (L-type)
- Dimensions: headset – W 11 x D 20 x H 20 mm (excl. cable)
- Weight: headset – approx. 12 g; microphone – approx. 3 g (excl. cable)
- Accessories: ear caps x 3 (S/M/L), clip x 1, pouch x 1, manual x 1
- Environmental considerations: RoHS
- Supported devices: smartphone with a 4-conductor dia. 3.5 mm mini jack

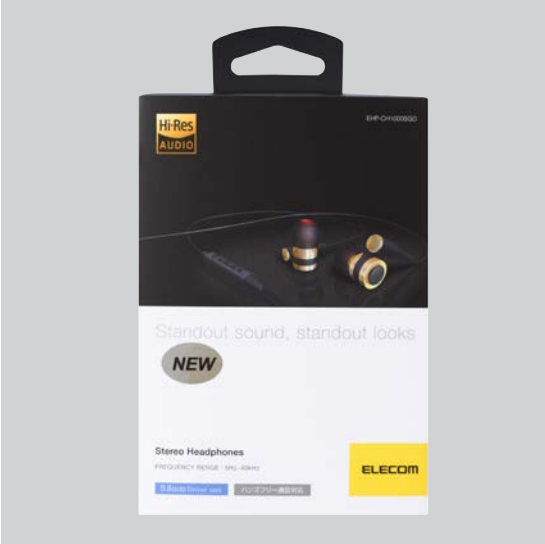
AVD | Headphones/Headset/Mic | Wired headset for smartphone

EHP-CH1000S series [Japanese Packaging]

Stereo headset for smartphones

High sound-quality stereo headphones that support high resolution music files, also known as hi-res audio. A stereo headset made with a dia. 9.8 mm driver and a highly rigid brass housing that can reproduce subtle, high quality sounds.



EHP-CH1000SGD

EHP-CH1000SSV

FEATURES

- High sound-quality stereo headset that supports high resolution music files, also known as hi-res audio.
- Made with a dia. 9.8 mm driver that can reproduce strong sounds in the low ranges and subtle sounds in the mid to high ranges.
- Made with a highly rigid diaphragm designed with a driver with ribs featuring a radial structure in order to prevent abnormal vibrations, such as deformed membranes, divided membranes or rolling. This allows it to take the input and produce a linear output with little distortion.
- The housing is made with highly rigid brass, which shuts out any excess vibrations generated by the drive yoke.
- Made with a newly developed sound hole structure called a Magnetic Turbo Axial Port, which places the driver, ball piece and magnet along the same axis. This allows the headset to respond smoothly when reproducing sounds from the low to high ranges.
- Newly designed deep-fitting ear caps allow for powerful bass by improving air tightness
- A differentiated firmness for the inside and outside of the ear caps to enable better sound quality and a snug fit. The two-stage depth adjustable construction provides comfort and improved air tightness.
- Includes three pairs of ear caps in different sizes so you can find the best fit (S/M/L).
- Made with a line cable that prevents it from becoming tangled.
- A microphone that allows you to enjoy conversation as well as music. Simply connect it to a smartphone with a 4-conductor dia. 3.5 mm mini jack.
- The microphone area has a built-in call pick-up/termination switch. Adjusting the volume is also possible.
- The microphone is set at an ideal height for comfortably carrying out conversations without the need to hold it in your hand.

  * Exclusively for 4-conductor mini plug smartphones. Some 4-conductor mini plug smartphones are not supported.

  * The call pick-up/termination switch cannot be used on Internet calls such as Skype™.

  * You may be able to use the remote control function for playing music/movies with some smartphones. The operating procedure differs depending on the device.

  * The call pick-up/termination switch cannot be used on Internet calls, such as Skype™.
- Includes a cable keeper for adjusting the cable length and storing the cable.
- Includes a pouch for storing your headphones, making them easier to carry them around. The pouch is made of PU leather, and is resistant to dirt and easy to store and take out.
- Uses a "type-L" gold-plated plug for compact connection with a device.

AVD | Headphones/Headset/Mic | Wired headset for smartphone

EHP-CH3000S series [Japanese Packaging]

Stereo headset for smartphones

From its original and attractive design it provides high-resolution audio to the fullest, thanks to a rigid vibrating plate made with a multi-layered film.

EHP-CH3000SBK

EHP-CH3000SGN

FEATURES

- High quality stereo headphones that support high resolution music files, also known as hi-res audio.
- Made with a dia. 12.5 mm driver that can reproduce strong sounds in the low ranges and subtle sounds in the mid to high ranges.
- Featuring a rigid vibrating plate in a radial construction with 'Teijin®Tetoron®MLF', a PET (Polyethylene terephthalate) film developed by Teijin Limited, as the base material, reproducing sounds in rich low ranges and clean high ranges that naturally expand.
- Neodymium magnets are used to accelerate the vibration speed of the diaphragm so that even more powerful low sounds can be delivered.
- The "Magnetic Turbo Axial Port" design situates the driver, bowl and magnets along the same axes, allowing for a smooth response that spans from lows to peaks.
- Super-hard aluminum is used for the housings, shutting out excess vibration from the driver yokes and faithfully reproducing sound signals from the diaphragm, while achieving robustness and lightness.
- The "Depth Fit Earpiece" design features an enlarged tip for greater air-tightness, assuring the delivery of overwhelmingly powerful low sounds. A differentiated firmness for the inside and outside of the ear caps enables better sound quality and a snug fit.
- The two-stage depth adjustable construction provides comfort and improved air tightness.
- Includes three pairs of ear caps in different sizes so you can find the best fit (S/M/L)

SPECIFICATIONS

- Sound system: airtight
- Fit style: in-ear type
- Driver unit: dynamic, dia. 12.5 mm
- Speaker input impedance: 16 Ω
- Sound pressure sensitivity: 100 dB/1 mW
- Maximum input power: 100 mW
- Frequency response: 5Hz to 40kHz
- Cable length: 1.2 m (Y-type)
- Plug type: dia.3.5mm 4-conductor mini-plug (L-type)
- Dimensions: headset - W14 x D27 x H33mm (excl. cable)
- Weight: headset – approx. 8 g; microphone – approx. 3g (excl. cable)
- Accessories: ear caps x 3 (S/M/L), cable keeper x 1, pouch x 1, manual x 1
- Environmental considerations: RoHS
- Supported devices: smartphones with a 4-conductor dia. 3.5 mm mini plug
- Other:* This product is a cable for a smartphone with four conductor mini plug. Some 4-conductor mini plug smartphones are not supported. Please visit Elecom's homepage for the latest support information.

AVD | Headphones/Headset/Mic | Wired headset for smartphone

EHP-CS2D3510 series [Japanese Packaging]

Stereo headset for smartphones

Reproduces dynamic, natural sound. Equipped with two dynamic drivers which can reproduce sound with depth in the low-to mid-range frequencies.

EHP-CS2D3510BK

EHP-CS2D3510RD

EHP-CS2D3510WH

FEATURES

- Two dynamic drivers with dia. 6mm can reproduce delicate and balanced sound with depth in the low- to mid-range frequencies
- The housing is designed to have more inner space for the 'sound amplification chamber', which enhances the audio effects created by the dual driver, delivering richer, extended sound.
- The silicone ear caps feature a double structure with differentiated firmness between the inside and the outside layers, preventing sound leakage while improving bass sound.
- The ear caps come in three generic sizes, S/M/L, so you can choose the best size to fit your ears.
- Featuring a durable, tangle-free line cable.
- Plug into a smartphone with a dia.3.5mm 4-conductor mini-plug to enjoy music as well as telephone conversations.
- The inline remote control with its built-in mic has slide switches for picking up/terminating calls and controlling volume.
- The microphone is placed at a height just right for hands-free conversations.

  * Exclusively for 4-conductor mini plug smartphones. Some 4-conductor mini plug smartphones are not supported.

  * The call pick-up/termination switch cannot be used on Internet calls such as Skype™

  * You may be able to use the remote control function for playing music/movies with some smartphones. The operating procedure differs depending on the device.

  * The call pick-up/termination switch cannot be used on some applications.
- Includes a cable keeper for adjusting the cable length and storing the cable.
- Includes a pouch for storing your headphones, making them easier to carry around.
- Uses a "type-L" gold-plated plug for compact connection with a device.

SPECIFICATIONS

- Sound system: airtight
- Fit style: in-ear type
- Driver unit: dynamic, dia. 6 mm (two on one side)
- Speaker input impedance: 10.6 Ω
- Sound pressure sensitivity: 104 dB/1 mW
- Maximum input power: 3 mW
- Frequency response: 20 Hz to 20 kHz
- Cable length: approx. 1.2 m (Y-type)
- Plug type: dia.3.5 mm 4-conductor gold plate mini-plug (L-type)
- Dimensions: headset – W 13 x D 23 x H 18 mm (excl. cable)
- Weight: headset – approx. 4 g; microphone – approx. 2 g (excl. cable)
- Accessories: ear caps x 3 (S/M/L), clip x 1, manual x 1
- Environmental considerations: RoHS
- Supported devices: smartphone with a 4-conductor dia. 3.5 mm mini jack

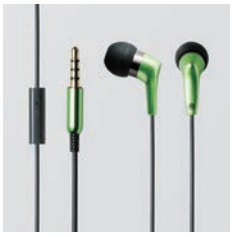
EHP-CS3510M series [Japanese Packaging]

Stereo headset for smartphones

Comes with a mic to let you enjoy music and calls on your smartphone. Take and end calls easily from your smartphone with this stereo headset, equipped with a dia. 3.5 mm 4-conductor mini jack.

EHP-CS3510MBK

EHP-CS3510MBU



EHP-CS3510MGN

EHP-CS3510MPN

EHP-CS3510MRD

EHP-CS3510MWH

FEATURES

- This dual-ear stereo headset connects to smartphones through a dia. 3.5 mm 4-conductor mini jack, allowing you to both enjoy music and make calls.
- The mic comes with a call pick-up/termination switch. You can also adjust the volume.
- Users can adjust the mic to a height that allows them to easily talk without needing to hold the smartphone.
- The product comes with a stylish straight plug in the same color as the headset itself.
- A well-balanced headset that cleanly covers both the highs and lows of an audio track.
- This headset fits to the size of your ear and blocks out unwanted noise.
- These inner-ear-type stereo headset allows you to wear it without worrying about messing up your hair.
- Select the ear cups you like to get the best fit. Available in XS, S, M, and L.
- The cable is 1.2 m, long enough to allow you to easily place your smartphone in your bag while connected.

* Some 4-conductor mini plug smartphones are not supported.

* The call pick-up/termination switch cannot be used on some applications.

SPECIFICATIONS

- Supported devices: smartphones with a 4-conductor dia. 3.5 mm mini jack
- Type: airtight
- Fit style: in-ear type
- Driver unit: dynamic dia. 7.8 mm
- Impedance: 16 Ω
- Sound pressure sensitivity: 90 dB/1 mW
- Max. input power: 5 mW
- Frequency range: 20 Hz to 20 kHz
- Cable length: 1.2 m (Y-type)
- Plug: dia. 3.5 mm 4-conductor mini plug (L-type)
- Dimensions: headset – W 11 x D 20 x H 20 mm
  mic – W 6 x D 3 x H 20 mm (excl. cable)
- Weight: headset – approx. 4 g; mic – approx. 3 g (excl. cable)
- Accessories: ear caps (XS/S/M/L) x 2

- Stereo headset for music and telephone conversations by connecting it with a smartphone that has a dia. 3.5 mm 4-conductor mini plug.
- The microphone area has a built-in call pick-up/termination switch. Adjusting the volume is also possible.
- Uses a flat cable that is easy to handle and is tangle-resistant. The color of its cable is the same as that of its body, so that it might make a good fashion item.
- The cable has a slider for preventing it from tangling.
- Reproduces well-balanced sound, from the low pitch to the high pitch.
- In-ear type to provide high sound insulation and fit your ears perfectly, which also means you do not have to worry about messing up your hair.
- Uses the a "type-L" plug for compact connection with a smartphone.
- Includes four pairs of ear caps in different sizes to fit your ears (XS/S/M/L).

* Some 4-conductor mini plug smartphones are not supported.

* The call pick-up/termination switch cannot be used on Internet calls such as Skype™.

* You may be able to use the remote control function for playing music/movies with some smartphones. The operating procedure differs depending on the device.

* The call pick-up/termination switch may not function correctly with some applications.

SPECIFICATIONS

- Supported devices: smartphones with a 4-conductor dia. 3.5 mm mini jack
- Sound system: airtight
- Fit style: in-ear type
- Driver unit: dynamic, dia. 9 mm
- Impedance: 16 Ω
- Sound pressure sensitivity: 98 dB/1 mW
- Max. input power: 8 mW
- Frequency range: 20 Hz to 20 kHz
- Cable length: 1.2 m (Y-type)
- Plug: 4-conductor dia. 3.5 mm mini plug (L-type)
- Dimensions: headset – W 14 x D 21 x H 19 mm
  mic – W 8 x D 7 x H 33 mm (excl. cable)
- Weight: headset – approx. 3 g; mic – approx. 3 g (excl. cable)
- Contents: ear caps x 4 (XS/S/M/L), manual x 1
- Environmental considerations: RoHS

EHP-CS3540R-G series [English Packaging]

Stereo headset with retractable cable

A stereo headset with a microphone for smartphones and a retractable cable with a five-stage adjuster.

EHP-CS3540RBK-G

EHP-CS3540RM2-G

EHP-CS3540RPN-G

FEATURES

- Smartphone stereo headset with a microphone and a retractable cable with a five-stage adjuster.
- The reel has a clip to attach it to shirts or pockets.
- In-ear type to provide high sound insulation and a snug fit.
- Ear caps are included so you can find your perfect fit. Come in four sizes: normal S, M, L, and XS for a smaller fit.
- High performance dia. 9mm driver to reproduce balanced clear sound from high pitch to low pitch.
- A model with a microphone that lets you enjoy music as well as conversation. Simply connect it to a smartphone with a 4-conductor dia. 3.5 mm mini plug jack.
- A microphone that has a call pick-up/termination switch.
- The microphone is placed right under the ear bud so you can have conversations while still making a stylish impression.

  * Exclusively for 4-conductor mini plug smartphones. Some 4-conductor mini plug smartphones are not supported.

  * The call pick-up/termination switch cannot be used on internet calls such as Skype™.

  * The remote control function for playing music/videos may be available with some smartphones. The operating procedures differ by model.

  * The call pick-up/termination switch may not function correctly with some applications.

SPECIFICATIONS

- Supported devices: smartphones with dia. 3.5 mm 4-conductor mini plug
- Sound system: airtight
- Fit style: in-ear
- Driver unit: dynamic, dia. 9 mm
- Impedance: 16 Ω
- Sound pressure sensitivity: 100 dB/1 mW
- Max. input power: 10 mW
- Frequency range: 20 Hz to 20 kHz
- Cable length: 0.8 m (Y-type, with retractable reel)
- Plug: dia. 3.5 mm 4-conductor mini plug
- Dimensions: main body – W13.5mm × D24mm × H26mm; retractable reel – W21mm × D17mm × H45mm (excluding cable)
- Weight: approx. 24g (incl. retractable reel and cable)
- Accessories: ear caps x 4 (XS/S/M/L), manual x 1
- Environmental considerations: RoHSOther:

AVD | Headphones/Headset/Mic | Wired headset for smartphone

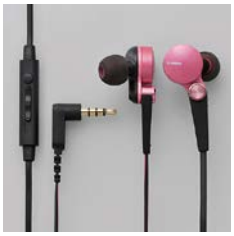
EHP-CS3570-G series [English Packaging]

Stereo headset for smartphones, 'Grand Bass System'

Our first model featuring the Grand Bass System, which achieves excellent reproduction of low frequency bass tones. Uniquely developed dia. 13.6 mm drivers achieve pumping bass and hi-fi sound.



EHP-CS3570PN-G

EHP-CS3570WH-G

FEATURES

- These stereo earbuds come with a smartphone-friendly microphone and feature the Grand Bass System, which offers pumping bass and hi-fi sound.
- Large-format, dia. 13.6 mm drivers reproduce a wide sonic range in great fidelity.
- A uniquely developed twin-chamber design retains deep reverb while achieving greater audio fidelity, delivering bass tones that are deep but crisp, with no muddy sound.
- Magnets installed on the front and back of the vibrating plates prevent magnetic flux leakage while increasing vibration speed, achieving stronger, deeper tones.
- A newly designed "deep-fitting" ear cap with a swollen tip provides improved air-tightness and reproduces amazing bass sound.
- A differentiated firmness for the inside and outside of the ear caps to enable better sound quality and a snug fit. The two-stage depth adjustable construction provides comfort and improved air tightness.
- Includes three pairs of ear caps in different sizes so you can find the best fit (S/M/L).
- A microphone that allows you to enjoy conversation as well as music. Simply connect it to a smartphone with a 4-conductor dia. 3.5 mm mini jack.
- The microphone area has a built-in call pick-up/termination switch. Adjusting the volume is also possible.
- The microphone is set at an ideal height for comfortably carrying out conversations without the need to hold it in your hand.

  * Designed for smartphones with a 4-pole mini plug. May not be compatible with some devices even if they are smartphones with a 4-pole mini plug.

  * The call pick-up/termination switch cannot be used on Internet calls, such as Skype™.

  * You may be able to use the remote control function for playing music/movies with some smartphones. The operating procedure differs depending on the device.

  * The call pick-up/termination switch may not function correctly with some applications.
- Uses a flat cable that is easy to handle and is tangle-resistant. Two-tone coloring of black and the body color.
- Includes a cable keeper for adjusting the cable length and storing the cable.
- Pouch for handy storage of the headset when carrying it around.
- Uses a "type-L" plug for compact connection with a device.

SPECIFICATIONS

- Supported devices: smartphones with a 4-conductor dia. 3.5 mm mini jack

AVD | Headphones/Headset/Mic | Wired headset for smartphone

EHP-CS3580-G series [English Packaging]

Stereo headset for smartphones, 'Grand Bass System'

GrandBass system for amazing bass sound.
A stereo headset with a large dia. 15.4 mm driver and large chambers to produce deep and clear bass.

EHP-CS3580BK-G

EHP-CS3580BU-G

EHP-CS3580RD-G

EHP-CS3580WH-G

FEATURES

- An in-ear type stereo headset with a microphone and featuring the Grand Bass system to reproduce very deep bass sound.
- It has a large dia. 15.4 mm driver unit to reproduce strong, powerful bass sound.
- Machined solid aluminum body made from high purity aluminum, cut rather than molded, to reduce unnecessary vibration.
- Uniquely designed large air chamber reproduces deep and clear bass sound by increasing the acoustic capacity and density.
- Front-oriented magnet construction allows for improved sound sensitivity, which is approximately 4dB higher than that of ELECOM's existing products.
- Newly designed deep-fitting ear caps to realize powerful bass sound by improving air tightness.
- Ear caps with a differentiated hardness between the inside and outside, providing a better sound quality and a snug fit at the same time. Also, a two-stage depth-adjustable construction adds to the snug fit and improved air tightness.
- Includes three pairs of ear caps in different sizes so you can find the perfect fit for your ears (S/M/L).
- A microphone so you can enjoy both music and conversation by connecting it to smartphones with a 4-conductor dia. 3.5 mm mini-plug jack.
- The microphone has a call pick-up/termination switch. Volume control is also possible.
- The microphone is set at an ideal height for comfortably carrying out conversations without the need to hold it in your hand.

  * Exclusively for 4-conductor mini plug smartphones. Some 4-conductor mini plug smartphones are not supported.

  * The call pick-up/termination switch cannot be used on Internet calls, such as Skype™.

  * The remote control function for playing music/videos may be available with some smartphones. The operating procedures differ depending on smartphones.

  * The call pick-up/termination switch may not function correctly with some applications.
- Uses a flat cable that is easy to handle and is tangle-resistant. It has a two-tone style of black and the body color.
- Cable keeper included for adjustment of cable length and handy storage when carrying around.
- Pouch included for handy storage when carrying the headset around.
- Uses a "type-L" plug for compact connection to a smartphone.

SPECIFICATIONS

- Supported device: smartphones with a dia. 3.5 mm 4-conductor mini plug (L-type)
- Sound system: airtight
- Fit style: in-ear type
- Driver unit: dynamic, dia. 15.4 mm
- Speaker input impedance: 16 Ω
- Sound pressure sensitivity: 100 dB/1 mW

AVD | Headphones/Headset/Mic | Wired headset for smartphone

EHP-CS3580 series [Japanese Packaging]

Stereo headset for smartphones, 'Grand Bass System'

GrandBass system for amazing bass sound.
A stereo headset with a large dia. 15.4 mm driver and large chambers to produce deep and clear bass.

EHP-CS3580BK

EHP-CS3580BU

EHP-CS3580WH

EHP-CS3580RD

FEATURES

- An in-ear type stereo headset with a microphone for smartphones, featuring the GrandBass system to reproduce very deep bass.
- A large dia. 15.4 mm driver unit to reproduce strong, powerful bass.
- Machined-solid aluminum body made from high purity aluminum, cut rather than molded, to reduce unnecessary vibration.
- Uniquely designed large air chamber reproduces deep and clear bass by increasing the acoustic capacity and density.
- Front-oriented magnet construction provides improved sound sensitivity, which is approximately 4 dB higher than that of ELECOM's existing products.
- Newly designed deep-fitting ear caps allow for powerful bass by improving air tightness
- A differentiated firmness for the inside and outside of the ear caps to enable better sound quality and a snug fit. The two-stage depth-adjustable construction provides comfort and improved air tightness.
- Ear caps with three different sizes (S,M,L) for you to choose the one that fits best.
- A microphone that allows you to enjoy conversation as well as music. Simply connect it to a smartphone with a 4-conductor dia. 3.5 mm mini jack.
- A microphone that has a call pick-up/termination switch. Volume control is also possible.
- A convenient placement of the microphone so you can speak without holding it.

  * Exclusively for 4-conductor mini plug smartphones. Some 4-conductor mini plug smartphones are not supported.

  * The call pick-up/termination switch cannot be used on Internet calls, such as Skype™.

  * The remote control function for playing music/videos may be available with some smartphones. The operating procedures differ depending on the smartphone.

  * The call pick-up/termination switch may not function correctly with some applications.
- Easy to handle and tangle-resistant flat cable. Two-tone coloring of black and the body color.
- Cable keeper included for adjustment of cable length and handy storage when carrying the headset around.
- Pouch for handy storage of the headset when carrying it around.
- A "type-L" plug for compact connection with a smartphone.

SPECIFICATIONS

- Supported devices: smartphones with dia. 3.5 mm 4-conductor mini jack
- Sound system: airtight
- Fit style: in-ear type
- Driver unit: dynamic, dia. 15.4 mm

AVD | Headphones/Headset/Mic | Bluetooth® headset

LBT-OH05-G series [English Packaging]

Bluetooth® overhead Headset

Class 1 Bluetooth® overhead headset offering stable data transmission, a lightweight feel and extremely comfortable fit.

LBT-OH05BK-G

LBT-OH05RD-G

LBT-OH05WH-G

FEATURES

- Bluetooth® overhead headset that offers you a superb fit and allows you to listen to music comfortably through wireless even when the music source, such as a smartphone, is located far away.
- Supports the high sound quality codec AAC. If you are connected with suitable players, such as those from compatible smartphones, you can enjoy high quality sounds via wireless.
- Made with Bluetooth® Class 1, offering stable transmissions that allow you to use them wherever you are in a room with little risk of losing connection. *Maximum transmission distance 100m (theoretical value), when connected to Class 1 devices.
- Low stress on your ears thanks to its lightweight design, weighing approx. 100g. In addition, made with imitation leather ear pads to offer a comfortable fit. Offering excellent sound quality and high class comfort even when using it for long periods of time.
- With NFC-compatible smartphones, simply do a touch operation to establish a connection. There is no need for you to open up the settings screen on your smartphone.
- Made with a double-joint structure that reduces stress on the ears. The headset can also be folded into a compact shape, making it easy to store and carry around.
- Featuring a large-capacity battery that offers enough power for everyday use, supporting 16 hours of continuous playback time. *When connecting through SBC. The playback time is 14 hours when connecting through AAC.
- You can also enjoy telephone conversations if you have a smartphone with a built-in microphone for calls. This functionality is extremely useful for answering calls quickly and offers 15 hours of continuous conversation time.
- As the headset supports the multi-point function, it can be on standby for two cell phones simultaneously.
- The BT setup application for Android smartphones is ready. Just by following the guide, pairing and setup are easy. You can download the application from Google play.

- Frequency range: 2.4GHz band
- Frequency modulation: FHSS (Frequency Hopping Spread Spectrum)
- Supported Bluetooth® profile: HFP, HSP, A2DP, AVRCP
- A2DP supported codec: SBC, AAC • A2DP supported contents protection: SCMS-T
- Number of allowable registered devices: 8
- Multi-point (simultaneous standby): supported
- NFC: supported • Speaker type: dynamic • Output sound pressure level: 94dB
- Driver unit: dia. 40 mm full range • Frequency range (A2DP): 20Hz to 20kHz
- Max. continuous playing time: SBC – 16 hours, AAC – 14 hours
- Max. continuous conversation time: 15 hours
- Max. continuous standby time: max. approx. 300 hours
- Power supply: 5V DC (for charging)
- Built-in battery: rechargeable lithium polymer battery
- Charging time: approx. 2 hours • Microphone model: electret condenser type
- Microphone directivity: omnidirectional • Microphone sensitivity: -38dB (1V/pa, at 1kHz)
- Microphone effective frequency band: 100Hz to 3,000Hz
- Input terminal: microUSB (for charging)
- Operation environment conditions (temperature): 5℃ to 35℃
- Operation environment conditions (relative humidity): 20% to 80% (without condensation)
- Storage environment conditions (temperature): 0℃ to 50℃
- Storage environment conditions (relative humidity): 20% to 80% (without condensation)
- Dimensions (W x D x H): 180×65×185mm (excluding protrusions)
- Weight: approx. 100 g • Regulations: TELEC/JATE/KC/NCC/SRRC/CE
- Conformity standards: BQB
- Accessories: USB charger cable×1, manual×1, precautions×1, compliance with regulations×1

AVD | Headphones/Headset/Mic | Bluetooth® headset

LBT-PHP505-G series [English Packaging]

Bluetooth® receiver with headset

Dual amp Class 1 model to enjoy super sound quality over a stable wireless with 100 mW+100 mW audio amp and RF amp (wireless). Playback up to 18 hours, with support for aptX and AAC codecs. High quality dual chamber headset with flat cables included.

LBT-PHP505BK-G

LBT-PHP505RD-G

FEATURES

- Dual amp Class 1 model to enjoy super sound quality over a stable wireless with 100 mW+100 mW audio amp and RF amp (wireless). Playback up to 18 hours, with support for aptX and AAC codecs. High quality dual chamber headset with flat cables included.
- By using your Bluetooth device with this product, the included high-quality headset can be easily used wirelessly and more freely.
- Equipped with a 100 mW+100m W high output headset amplifier to maximize the performance of your earphones.
- Using an RF amplifier (signal amplifier) and top class Bluetooth Class1 establishes a stronger, more stable signal compared to conventional Bluetooth. Enjoy a more comfortable sound without skipping or jumping.
- Equipped with support for higher quality sound and lower delay aptX and AAC codecs compared to conventional SBC codec. With 1/3 or less deviations between video and sound compared to conventional Bluetooth products, this is ideal for videos and games.
- Includes dual chamber earphones that employ a front magnet custom large-diameter driver of dia.13.6 mm. With the included excellent-fitting earpieces, you can listen to high-quality sound with the high-performing receiver.
- On an NFC compatible smartphone, connection set up only takes a tap. There is no need to open any smartphone settings screens.
- By making the "power and fail-safe hold" as a slide switch, and also by giving each button only one function, it is possible to have direct control when using this product where it has not been possible in conventional Bluetooth products.
- Uses a high quality aluminum dial to control volume. In addition, because the back has been made into a clip, it can be easily attached to your collar or chest pocket.
- This is easily powered via USB using a PC, USB charger, or other suitable device.
  Music playback up to 18 hours. *When using the SBC codec
- It is equipped with a microphone, so it can be used for phone calls with a smartphone or cellphone.

SPECIFICATIONS

- Supported devices: conversation - cell phones and smartphones equipped with HSP and HFP profiles; music playback – cell phones and smartphones that support A2DP
- Bluetooth version: Bluetooth 4.0
- Carrier frequency: 2.4 GHz band
- Spread spectrum: FHSS
- Communication distance: Class 1, 100 m maximum (theoretical value with no obstacles)
- Supported profiles: HSP/HFP/A2DP/AVRCP
- Multi-pairing: supported (8 devices)
- Audio property: SBC/AAC/aptX®
- Battery: rechargeable lithium polymer battery
- Continuous standby time: max. 350 hours
- Continuous operating time: max. 18 hours
- Connector type: micro USB
- Input voltage: DC5V (USB charging)
- Dimensions: W 23 × D 15 × H 69 mm (excluding protrusions)

MS-P06U series [Japanese Packaging]

2.0ch speakers for PC

Outlet not needed. Handy speakers for a PC.

MS-P06UBR

MS-P06UPB

MS-P06UWB

FEATURES

- 2.0ch stereo speakers with an effective maximum output of 2.0W. Enjoy stereo sound by plugging into a USB terminal of a PC or other device.
- USB power type that requires no household outlet. Just plug in to a PC's USB port to enjoy the sound.
- A versatile 3.5mm dia. stereo mini jack enables you to connect to a large variety of devices including a PC.
- Featuring a 50mm dia. round full-range driver that produces well balanced stable sound.
- Built-in amplifier which makes it easy to adjust the volume with the volume control knob in the rear.

SPECIFICATIONS

- Enclosure type: closed type
- Enclosure materials: resin
- Speaker unit size: dia. 50 mm
- Impedence: 4 Ω
- Effective maximum output (distortion factor 10%): 1.0 W+1.0 W
- Frequency range: 100-20 kHz
- Input terminal: dia. 3.5mm stereo mini jack
- Power supply: DC+5V USB
- Dimensions: approx. W 72 x D 75 x H 82 mm
- Weight: approx. 360 g
- Cable length: USB power cable - approx. 100 cm; stereo mini cable - approx. 100 cm; speaker cable - approx. 90 cm

LBT-SPPCPSL-G series [English Packaging]

Bluetooth® speaker, 'CAPSULE'

A beautiful speaker realizing "true wireless" technology. This high sound quality Bluetooth® speaker uses four passive radiators to create high quality sound.

LBT-SPPCPSLBR-G

LBT-SPPCPSLOG-G

LBT-SPPCPSLSB-G

FEATURES

- Twin passive radiators installed to bring out the best of the bass, allowing you to experience a rich, layered sound that seems to defy the speaker's simple appearance.
- Built-in chargeable lithium batteries, providing up to six hours of continuous playback, mean you can use your Capsule speaker anywhere.
- If you have an NFC-capable device, you can set up a connection with just a touch of your Capsule speaker.
- Compatibility for an Android support application, "ELECOM Easy BT pairing", supports connection to Android smartphones making this perfect for users new to Bluetooth® connection.

SPECIFICATIONS

- Communication method: Bluetooth® ver. 4.0 • Output: Bluetooth® power class2
- Max. communication range: 10 m • Frequency range: 2.4 GHz band
- Frequency modulation: FHSS (frequency hopping spread spectrum)
- Supported Bluetooth® profile: A2DP, AVRCP
- A2DP supported codec: SBC, AAC, aptX®
- A2DP supported contents protection: SCMS-T
- Number of allowable registered devices: 8
- NFC: supported • Type: dynamic
- Output sound pressure level: 85 dB/W • Max. input power: 4 W + 4 W
- Driver unit: dia. 40 mm full-range, bass reflex type for each unit
- Max. continuous playing time: 6 hours
- Max. continuous standby time: 240 hours
- Power supply: DC 5 V (AC adapter not included)
- Built-in battery: lithium-polymer battery
- Charging time: 1.5 hours
- Operating environment conditions (temperature): 0℃ to 40℃
- Operating environment conditions (relative humidity): 20% to 80% (without condensation)
- Storage environment conditions (temperature): -10℃ to 50℃
- Storage environment conditions (relative humidity): 20% to 80% (without condensation)
- Dimensions: W 60 x D 71 x H 62.5 mm (each unit)
- Weight: approx. 255 g (both units without the cradle)
- Regulations: TELEC/KCC/CE/NCC/BSMI/SRRC/CCC
- Environmental considerations: supported
- Accessories: cradle x 1, USB charger cable x 1, manual x 1, safety precautions x 1, compliance with regulations x 1

DH-HD14E2 series (Black) [Japanese Packaging]

High Speed HDMI cable with Ethernet support

An Ethernet-certified "Ethernet-capable High Speed HDMI cable" that fully supports the next-generation HDMI standard, realizing 100 Mbps Ethernet communication, in addition to video and audio signals.

DH-HD14E210BK
(cable length: 1.0 m)

DH-HD14E215BK
(cable length: 1.5 m)

DH-HD14E220BK
(cable length: 2.0 m)

DH-HD14E230BK
(cable length: 3.0 m)

DH-HD14E250BK
(cable length: 5.0 m)

FEATURES

- Ethernet-certified "Ethernet-capable High Speed HDMI cable" that fully supports the next-generation HDMI standard.
- Delivers bidirectional Ethernet communication in addition to high-speed digital video and audio signal transmission in a single cable.
- Supports HEC (HDMI Ethernet Channel), which provides 100 Mbps Ethernet communication.
- Supports ARC, enabling the transmission of digital audio from TVs or other display devices to output devices, such as an AV amp.
- Supports 3D Full HD (1080 p × 2 screens) and 4K2K (4096 × 2160 dots).
- Supports color depths from traditional 24-bit (Full Color) up to 30/36/48-bit (Deep Color), allowing for even richer color presentation.
- Featuring gold-plated plugs to prevent corrosion and lower signal degradation.
- Featuring a triple shielded cable that protects the signal from outside noise interference.
- The twisted pair structure reduces outside noise interference.

SPECIFICATIONS

- Supported devices: LCD TVs, plasma TVs and projectors with HDMI input ports and AV devices and game devices with HDMI output ports
- Standard: High Speed HDMI Cable with Ethernet
- Connector type: HDMI type A 19 pin – HDMI type A 19 pin
- Cable type: normal type
- Transmission speed: 10.2 Gbps
- Supported resolution: 4 K × 2 K
- Shield method: triple shielded
- Plug plating finish: gold plate pins
- Cable length:

  1.0 m (DH-HD14E210BK)
  1.5 m (DH-HD14E215BK)
  2.0 m (DH-HD14E220BK)
  3.0 m (DH-HD14E230BK)
  5.0 m (DH-HD14E250BK)

  * excl. connector
- Cable width: dia. 5.8 mm

DH-HD14EC series [Japanese Packaging]

Colorful HDMI cable

Multiple colors to coordinate any way you like. Supports 3D video transmission and ARC. An Ethernet-certified "Ethernet-capable High Speed HDMI cable" supporting 100 Mbps Ethernet communication, in addition to video and audio signals.

DH-HD14EC15BK

DH-HD14EC15BU

DH-HD14EC15DR

DH-HD14EC15GN

DH-HD14EC15PN

DH-HD14EC15WH

FEATURES

- Ethernet-certified "Ethernet-capable High Speed HDMI cable" that fully supports the next-generation HDMI standard.
- Delivers bidirectional Ethernet communication in addition to high-speed digital video and audio signal transmission in a single cable.
- Supports HEC (HDMI Ethernet Channel), which provides 100 Mbps Ethernet communication.
- Supports ARC (Audio Return Channel), enabling the transmission of digital audio from a TV or other display device to an output device such as an AV amp.
- Supports 3D Full HD (1080 p x 2 screens) and 4K2K (4096 x 2160 dots).
- Supports color depths from traditional 24-bit (Full Color) up to 30/36/48-bit (Deep Color), allowing for even richer color presentation.
- Includes gold-plated plugs for powerful prevention of signal degradation due to rusting.
- The cable is triple-shielded to protect the signal against interference from external noise.
- Utilizes a twisted-pair construction to limit effects from external noise.

SPECIFICATIONS

- Supported devices: AV equipment, game machines, PCs, and PC peripherals with HDMI input ports
- Standard: High Speed HDMI Cable with Ethernet
- Connector type: HDMI type A 19 pin – HDMI type A 19 pin
- Cable type: normal type
- Transmission speed: 10.2 Gbps
- Supported resolution: 4 K x 2 K supported
- Shield method: triple shielded
- Plug plating method: gold plating
- Cable length: 1.5 m
- Cable width: approx. 6.0 mm

DH-HD14EK15/P [Japanese Packaging]

High Speed HDMI cable with 4K Ethernet support

Supports 4K video streaming that supersedes the image quality of Full HD.
An Ethernet-certified "Ethernet-capable High Speed HDMI cable" supporting 100 Mbps Ethernet communication, in addition to video and audio signals.

DH-HD14EK15/P

FEATURES

- Ethernet-certified "Ethernet-capable High Speed HDMI cable (Category 2)" that fully supports 4K2K splitter with full HD 3D.
- Delivers bidirectional Ethernet communication in addition to high-speed digital video and audio signal transmission in a single cable.
- Supports HEC (HDMI Ethernet Channel), which provides 100 Mbps Ethernet communication.
- Supports ARC, enabling the transmission of digital audio from TVs or other display devices to output devices, such as an AV amp.
- Supports color depths of 30/36/48-bit (Deep Color), allowing for even richer color presentation.
- An environmentally friendly product in compliance with the EU's RoHS Directive on the Restriction of the use of certain Hazardous Substances.

SPECIFICATIONS

- Supported devices: LCD displays, projectors and LCD TVs with HDMI input ports and PCs and game devices with HDMI output ports
- Standard: High Speed HDMI cable with Ethernet
- Connector type: HDMI type A 19 pin – HDMI type A 19 pin
- Cable type: normal type
- Transmission speed: 10.2 Gbps
- Supported resolution: 4 K × 2 K
- Shield method: triple shielded
- Cable length: 1.5 m * excl. connector
- Cable width: dia. 5.5 mm

DH-HD14EN series [Japanese Packaging]

HDMI cable with ferrite core

HDMI cable with a ferrite core that absorbs electromagnetic wave noise for more accurate signal transmission. Supports 3D video transmission and ARC (Audio Return Channel). An Ethernet-certified "Ethernet-capable High Speed HDMI cable with a ferrite core" supporting 100 Mbps Ethernet communication, in addition to video and audio signals.

DH-HD14EN10BK
(cable length: 1.0 m)

DH-HD14EN20BK
(cable length: 2.0 m)

DH-HD14EN30BK
(cable length: 3.0 m)

DH-HD14EN50BK
(cable length: 5.0 m)

FEATURES

- Ethernet-certified "Ethernet-capable High Speed HDMI cable" that fully supports the next-generation HDMI standard.
- The ferrite core absorbs minute electromagnetic wave noise caused by the high frequency wave of the HDMI, in order to transfer signals more accurately.
- Delivers bidirectional Ethernet communication in addition to high-speed digital video and audio signal transmission in a single cable.
- Supports HEC (HDMI Ethernet Channel), which provides 100 Mbps Ethernet communication.
- Supports ARC, enabling the transmission of digital audio from TVs or other display devices to output devices, such as an AV amp.
- Supports 3D Full HD (1080 p × 2 screens) and 4K2K (4096 × 2160 dots).
- Supports color depths from traditional 24-bit (Full Color) up to 30/36/48-bit (Deep Color), allowing for even richer color presentation.
- Featuring gold-plated plugs to prevent corrosion and lower signal degradation.
- Featuring a triple shielded cable that protects the signal from outside noise interference.
- The twisted pair structure reduces outside noise interference.

SPECIFICATIONS

- Supported devices: AV devices, game devices, PCs and peripheral devices with HDMI input terminals
- Standard: High Speed HDMI Cable with Ethernet
- Connector type: HDMI type A 19 pin to HDMI type A 19 pin
- Cable type: normal type
- Transmission speed: 10.2 Gbps
- Supported resolution: 4 K × 2 K
- Shield method: triple shielded
- Cable length:

  1.0 m (DH-HD14EN10BK)
  2.0 m (DH-HD14EN20BK)
  3.0 m (DH-HD14EN30BK)
  5.0 m (DH-HD14ER50BK)
  * excl. connector
- Cable width: dia. 5.5 mm

Memory | Memory card | micro SD

MF-MRSD series [Japanese Packaging]

MicroSDHC memory card with UHS-I support

A microSD memory card supporting UHS-I which offers 20 MB/s maximum read speed.

MF-MRSD08GU20
(Capacity: 8 GB)

MF-MRSD16GU20
(Capacity: 16 GB)

MF-MRSD32GU20
(Capacity: 32 GB)

FEATURES

- A microSD memory card that offers 20 MB/s maximum read speed.
  * The indicated max. transfer speed is the measured value obtained under the environment specified by Elecom. Elecom does not guarantee the same value for all other environments.
- Supports UHS-I/UHS Speed Class 1 for high-speed interfaces and SD Speed Class 10 which guarantees the minimum read/write rate.
  * Can be used with devices with no UHS-I interface support. However, the full performance is achieved only when used with the devices supporting UHS-I.
- Suitable for smartphones and tablet PCs.
- Includes a SD conversion adapter.
- Complies with IPX7 of JIS Water Resistance to provide protection against water when you accidentally drop it in water.
  * The included conversion adapter is not water resistant.
- Equipped with copyright-protective function applying the CPRM technology.

SPECIFICATIONS

- IInterface: microSD
- Memory standard: microSDHC, Class10, UHS-I
- Capacity:
  8 GB (MF-MRSD08GU20)
  16 GB (MF-MRSD16GU20)
  32 GB (MF-MRSD32GU20)
- Max. transfer speed: 20 MB/s for reading
- Minimum guaranteed speed: 10 MB/sec
- Dimension: W 15.0 × D 1.0 × H 11.0 mm
- Weight: 0.4 g
- Accesorries: SD adapter × 1

Memory | Memory card | SD

MF-FSD series [Japanese Packaging]

SDHC memory card with UHS-I support

A SD memory card supporting UHS-I which offers 20 MB/s maximum read speed.

MF-FSD08GU20
(Capacity: 8 GB)

MF-FSD16GU20
(Capacity: 16 GB)

MF-FSD32GU20
(Capacity: 32 GB)

FEATURES

- A SD memory card that offers 20 MB/s maximum read speed.
  * The indicated max. transfer speed is the measured value obtained under the environment specified by Elecom. Elecom does not guarantee the same value for all other environments.
- Supports UHS-I/UHS Speed Class 1 for high-speed interfaces and SD Speed Class 10 which guarantees the minimum read/write rate.
  * Can be used with devices with no UHS-I interface support. However, the full performance is achieved only when used with the devices supporting UHS-I.
- Suitable for digital single lens cameras and digital video cameras.
- Equipped with copyright-protective function applying the CPRM technology.

SPECIFICATIONS

- Interface: SD
- Memory standard: SDHC, Class 10, UHS-I
- Capacity:
  8 GB (MF-FSD08GU20)
  16 GB (MF-FSD16GU20)
  32 GB (MF-FSD32GU20)
- Max. transfer speed: 20 MB/s for reading
- Minimum guaranteed speed: 10 MB/sec
- Dimension: W 24.0 × D 2.1 × H 32.0 mm
- Weight: 2.0 g

PC | Accessories | PC glasses

OG-YBLP series [Japanese Packaging]

Blue-light blocking glasses (65%)

High quality model made in Japan that cuts blue-light by 65%. Blue-light protective glasses that focus on cutting blue-light emitted from displays on PCs and smartphones.

OG-YBLP01GN

OG-YBLP01WN

OG-YBLP01NV

FEATURES

- PC GLASSES – blue-light protective glasses that protect your eyes and cut approximately 65% of blue light emitted by displays on PCs and smartphones.
- High quality model completely made in Japan, from the frame to the lenses.
- Light, rimless design that does not obstruct visibility – ideal for people who stare at displays for long periods of time.
- Their rimless design allows them to fit flexibly on faces of varying widths, offering the best optical performance without causing distortion to the lenses.
- Fitting gently around the face, these glasses are designed with semi-straight temples that prevent tiredness even when wearing them for long periods of time.
- The temple is made with TR-90, an ultra lightweight and flexible material developed in Switzerland, providing a greater fit and comfort.
- The temples are fitted with holes that can be used to affix glasses' chains, and the like.
- Includes a pouch that is handy for carrying the glasses around.

SPECIFICATIONS

- Frame type: rimless
- Lens color: brown
- Size: 54□17-131
- Weight: 16 g
- Lens material: plastic
- Frame material: plastic
- Temples material: plastic
- Visible light transmittance: 66%
- Blue-light reduction rate: 65%

  * the mean value of measurements performed by the JSOI (Japan Spectacles and Popular Optics Inspection Institute)
- UV transmittance: 1.0% or less
- Contents: glasses x 1, pouch x 1
